## MECCANO X SERIES CONSTRUCTOR OUTFITS

The Meccano X Series of Outfits gives an added interest to the fascinating pastime of Meccano model-building. The main feature of the series is a specially designed type of strip  $\frac{3}{4}$ -in. wide, available in various lengths, and pierced with holes  $\frac{1}{4}$ -in. apart. The models made with these strips are extremely attractive and effective. That of the Steam Shovel illustrated here is an example of the type of super model that can be built with Meccano X Series parts. These parts can be used in conjunction with standard Meccano parts and accessories, and they may be obtained separately.

### No. X1 OUTFIT Builds 70 Models

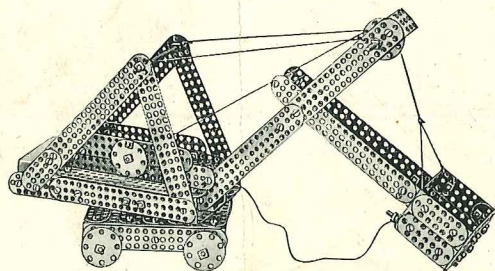

A fine range of sturdy models can be built with No. X1 Outfit. Examples of 70 are given in the illustrated instruction Folder that is included, while keen model builders will derive great satisfaction from building additional models of their own creation.

This Outfit is the finest value in constructional toys ever offered to boys.

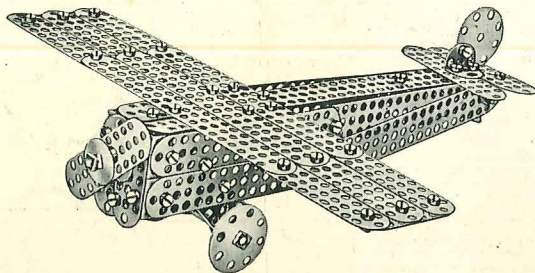

Price ... .. **35 cents**

*A No. X1a Accessory Outfit, (costing 25 cents) converts a No. X1 Outfit into a No. X2.*

A splendid model built with an X2 Outfit

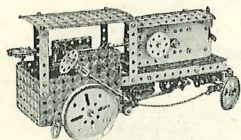

### No. X2 OUTFIT Builds 96 Models

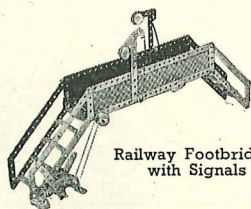

Monoplane built solely of X Series parts

The additional parts contained in No. X2 Outfit enable models of a bigger and better type to be constructed, including a modern Battleship and Submarine, Steam Shovel, Windmill, Swing Bridge and Railway Breakway Crane. The total number of models shown in the Instruction Folder included in this Outfit is 96, but scores of others can easily be made by inventive boys. Price **50 cents**

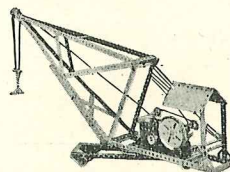

# *A Choice Selection of Meccano Models*

## OUTFIT O Builds 120 Models

THE WORLD'S  
HAPPIEST  
BOYS ARE  
MECCANO  
BOYS

## OUTFIT A Builds 217 Models

This Outfit contains a good selection of Meccano parts and is specially suitable for the younger boys for whom it will provide hours of fun. The Instruction Manual packed in the Outfit gives 120 examples of models that can be built, consisting of Trucks, Wagons, Aircraft, Pulleys and a variety of others, including an interesting selection fitted with the *Magic Motor* (see page 11).

Price ... .. 95 cents

This is an excellent Outfit with which to commence the Meccano hobby. A profusely illustrated Manual of Instructions is included showing how 217 interesting models can be constructed. This fine range includes Ships, Steam Engine, Cranes, Trolleys, Horses and Carts, Scales, Swing, etc., each capable of providing the most fascinating entertainment for boys. A special page of working models fitted with the *Magic Motor* (see page 11) is also included.

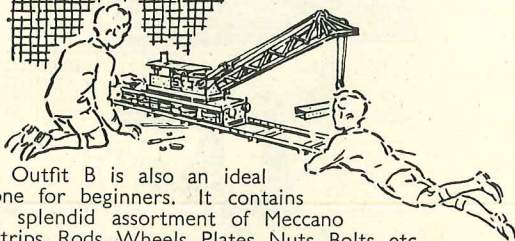

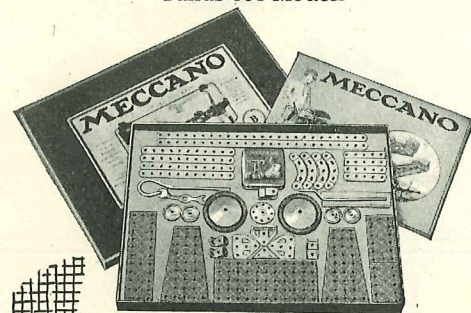

Price ... .. \$1.25

*An Aa Accessory Outfit, costing 75 cents, will convert an A into a B Outfit.*

NOTE.—Meccano parts can be purchased separately. See list on pages 13 to 16.

# MECCANO CONSTRUCTOR OUTFITS

**OUTFIT B**  
Builds 338 Models

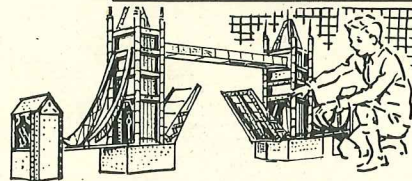

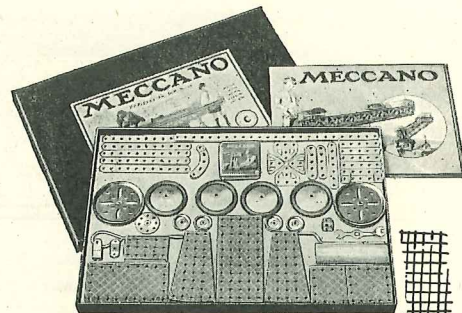

Outfit B is also an ideal one for beginners. It contains a splendid assortment of Meccano Strips, Rods, Wheels, Plates, Nuts, Bolts, etc., and a special Manual of Instructions giving examples of 338 models that can be built. The models illustrated include Motor Cycle and Sidecar, Clock, Wrestlers, Flyboats, Signals, Furniture, Arc Lamp and a variety of others, amongst which are sixteen of special interest showing how the *Magic Motor*, described on page 11, can be fitted to increase the fun and realism. Everything necessary for building the models is included.

Price ... .. **\$2.00**

*A Ba Accessory Outfit, costing 85 cents, will convert a B into a C Outfit.*

**MECCANO  
BOYS BUILD  
AND  
INVENT**

**OUTFIT C**  
Builds 449 Models

This popular Outfit is a great favourite with boys. It contains a large number and an excellent variety of Meccano parts with which a fine range of models can be built, including Levers, Pulley Blocks, Pneumatic Hammers, Excavator, Ballista, Drills, etc. A big, fully illustrated Manual of Instructions is included, giving examples of 449 models, an interesting selection of which are fitted with the *Magic Motor* described on page 11.

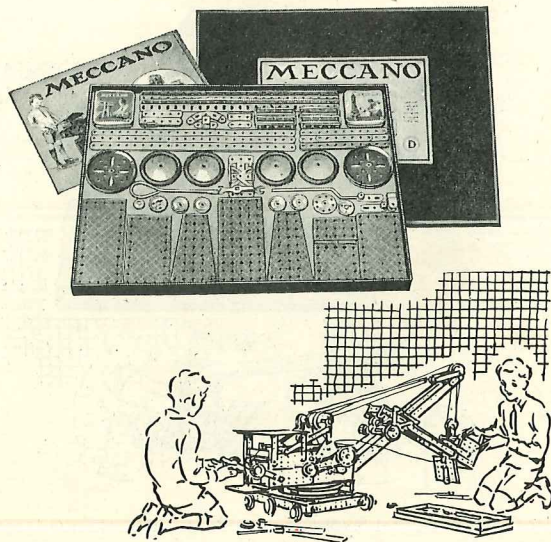

Price ... .. **\$2.75**

*A Ca Accessory Outfit, costing \$1.50, will convert a C into a D Outfit.*

**NOTE.**—Meccano parts can be purchased separately. See list on pages 13 to 16.

# MECCANO CONSTRUCTOR OUTFITS

## OUTFIT D Builds 479 Models

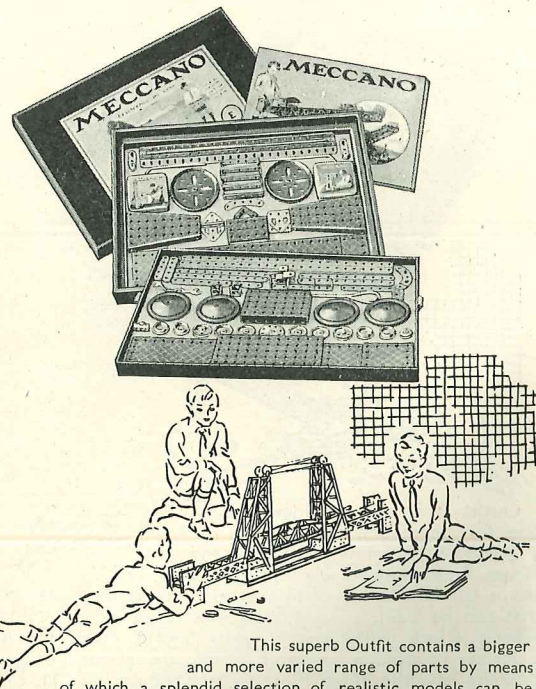

The fortunate possessor of an Outfit D is able to build models of a more complicated and interesting type, including large Cranes, Pithead Gear, Motor Wagons, Lathe, Elevator, Turnstile, Mechanical Hammer, etc., all designed on correct engineering principles. Full instructions for building 479 models are included with the Outfit.

Price ... .. \$4.00

*A Da Accessory Outfit, costing \$1.75, will convert a D into an E Outfit.*

NOTE.—Meccano parts can be purchased separately. See list on pages 13 to 16

## OUTFIT E Builds 512 Models

This superb Outfit contains a bigger and more varied range of parts by means of which a splendid selection of realistic models can be built, including Roundabout, Fire Engine, Windmill, Cranes, etc. Full instructions for building 512 models are included.

Price ... .. \$5.50

*An Ea Accessory Outfit, costing \$2.75, will convert an E into an F Outfit.*

# MECCANO CONSTRUCTOR OUTFITS

## OUTFIT F

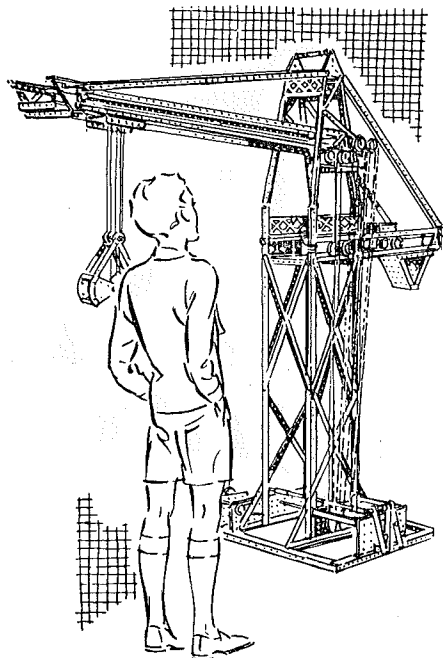

Buils 554 Models

This magnificent Outfit contains a big assortment of Meccano parts of an advanced engineering type. The Cranes, Bridges, and scores of other marvellous structures that it builds are of a better type and, in addition, such excellent models as a Tower Wagon, Vertical Steam Engine and Railway Break-down Crane can be constructed. A Manual of Instructions, showing how to build 554 models, is included.

Price ... .. \$8.00

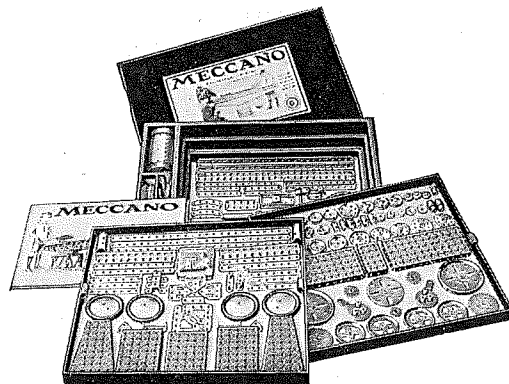

*An Fa Accessory Outfit, costing \$7.00, will convert an F into a G Outfit.*

THE PERFECT GIFT  
FOR BOYS

## OUTFIT G

Buils 620 Models

A most fascinating and extremely interesting range of models can be built with this fine Outfit, including Steam Shovel, Submarine, Telfer Span, Automatic Saw, Cranes of various types, and many others. The Manuals included give examples of 620 models.

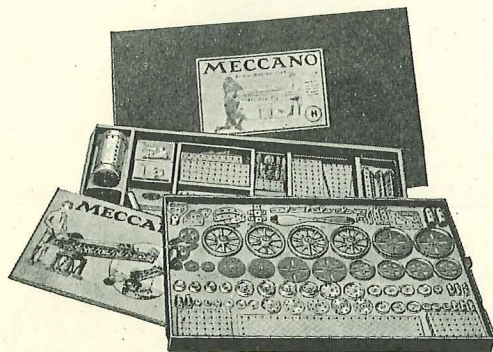

Price ... .. \$14.50

*A Ga Accessory Outfit, costing \$5.00, will convert a G into an H Outfit.*

NOTE.—Meccano parts can be purchased separately.  
See list on pages 13 to 16.

# MECCANO CONSTRUCTOR OUTFITS

**OUTFIT H**  
Builds 666 Models

**OUTFIT K**  
Builds 709 Models

**OUTFIT L**  
Builds 745 Models

Model-building possibilities are very greatly increased with this Outfit, and 666 fine examples of real engineering models, including Vertical Marine Engine, Motor Plough, Travelling Crane, Auto Swing and Steam Wagon, are illustrated in the Manuals that are provided. The Outfit is supplied either in a stout carton or in a handsome enamelled cabinet. The number of Meccano parts contained in either type of Outfit is the same.

Price (packed in strong carton) **\$19.50**

Price (packed in enamelled cabinet) **\$25.00**

*An H Accessory Outfit, costing \$15.50, will convert an H into a K Outfit.*

Realistic working models of many of the world's most famous engineering masterpieces can be built with this Outfit. They include Automatic Weighing Machine, Drop Hammer, Derricking Grab, Electric Locomotive, Vertical Lift Bridge, Watt's Steam Engine and many others. The Manuals of Instructions included give examples of 709 splendid models. The K Outfit is supplied either in a stout carton or in a handsome enamelled cabinet. The number of Meccano parts contained in either type of Outfit is the same.

Price (packed in stout carton) ... **\$35.00**

Price (packed in enamelled cabinet) **\$40.00**

This is a complete and comprehensive Outfit, containing all the Meccano parts necessary to build each of the models featured in all the Manuals of Instructions. It is an ideal present for a boy interested in mechanics.

Price (packed in beautifully enamelled cabinet fitted with lock and key) ... **\$100.00**

*A Ka Accessory Outfit, costing \$55.00, will convert a K into an L Outfit.*

*NOTE.—Meccano parts can be purchased separately. See list on pages 13 to 16.*

# MECCANO X SERIES CONSTRUCTOR OUTFITS

The Meccano X Series of Outfits gives an added interest to the fascinating pastime of Meccano model-building. The main feature of the series is a specially-designed type of strip  $\frac{3}{4}$ -in. wide, available in various lengths, and pierced with holes  $\frac{1}{4}$ -in. apart. The models made with these strips are extremely attractive and effective. That of the Steam Shovel illustrated here is an example of the type of super model that can be built with Meccano X Series parts. These parts can be used in conjunction with standard Meccano parts and accessories, and they may be obtained separately.

## No. X1 OUTFIT Builds 70 Models

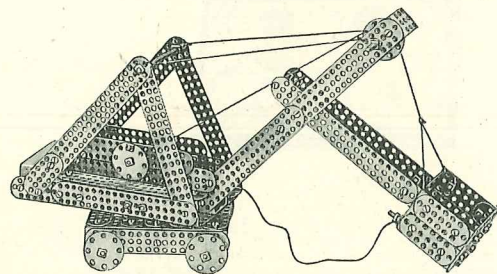

A fine range of sturdy models can be built with No. X1 Outfit. Examples of 70 are given in the illustrated Instruction Folder that is included, while keen model builders will derive great satisfaction from building additional models of their own creation.

This Outfit is the finest value in constructional toys ever offered to boys.

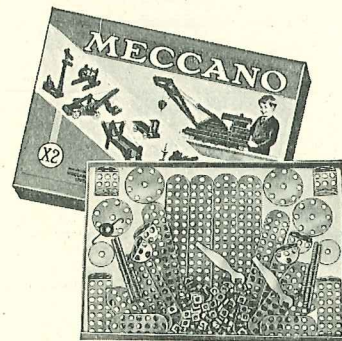

Price ... .. **35 cents**

*A No. X1a Accessory Outfit, (costing 25 cents) converts a No. X1 Outfit into a No. X2.*

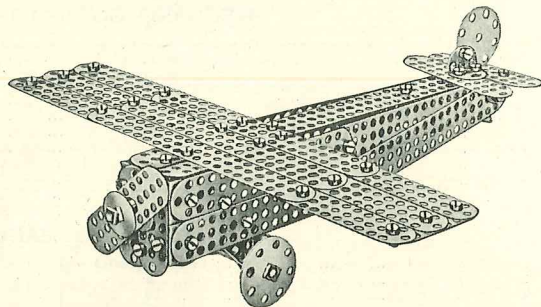

A splendid model built with an X2 Outfit

## No. X2 OUTFIT Builds 96 Models

The additional parts contained in No. X2 Outfit enable models of a bigger and better type to be constructed, including a modern Battleship and Submarine, Steam Shovel, Windmill, Swing Bridge and Railway Breakdown Crane. The total number of models shown in the Instruction Folder included in this Outfit is 96, but scores of others can easily be made by inventive boys. Price **50 cents**

Monoplane built solely of X Series parts

# MECCANO ACCESSORY AND CONNECTING OUTFITS

## ACCESSORY OUTFITS

*Ba Accessory Outfit*

Each complete Meccano Outfit can be converted into the one next larger by means of a Meccano Accessory Outfit. Thus, a boy who commences with one of the small Outfits may build up his equipment by easy stages until he is the possessor of an L Outfit.

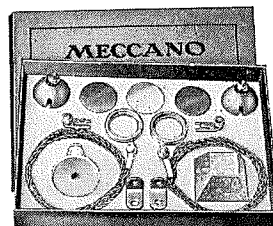

An A Outfit may be converted into a B by adding to it an Aa Accessory Outfit. A Ba Accessory Outfit would then convert the B Outfit into a C, and so on.

## MECCANO LIGHTING SET

It is great fun to illuminate your Meccano models by electric light and a special Meccano Lighting Set can be obtained from your dealer for this purpose. This consists of two spot lights with plain and coloured imitation glass discs, one stand lamp, two special brackets and two pea lamps, operated from a 4-volt flashlamp battery not included in the set. The stand lamp is used for decorative purposes and the spot lights can be used as car headlamps, floodlights on cranes, and in countless other attractive ways.

Price ... .. **\$1.25**

## MECCANO OUTFIT No. 000 (Numerical Series)

This splendid Outfit contains a good selection of Meccano parts and is specially suitable for the younger model-building enthusiasts. Full instructions are given for building 162 fine models, including Trucks, Wagons, Aeroplanes, Trolleys, etc.

Price ... .. **70 cents**

## MECCANO CONNECTING OUTFITS

A series of Meccano Connecting Outfits is available, by means of which owners of numerical Outfits can convert them into Outfits in the alphabetical series. Details are as follows:—

# MECCANO CLOCKWORK MOTORS

These are the finest Clockwork motors obtainable for model driving. They have exceptional power and length of run and their gears are cut with such precision as to make them perfectly smooth and steady in operation.

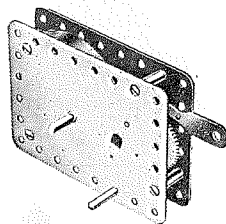

Meccano Clockwork Motors are especially suitable for small models built with a limited range of parts. They are extremely simple to operate and have the advantage of being entirely self contained.

## The MECCANO *MAGIC* MOTOR

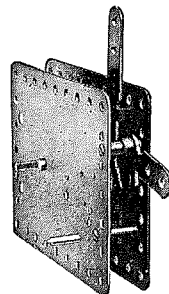

The Meccano *Magic* Motor is well designed and strongly constructed and is fitted with a powerful spring giving a long and steady run. It is non-reversing. Each *Magic* Motor is supplied with a separate  $\frac{1}{4}$ " Pulley Wheel and three pairs of Driving Bands of different lengths. It is capable of driving all light models built with the smaller Outfits ... .. Price **50 cents**

## No. 1 CLOCKWORK MOTOR

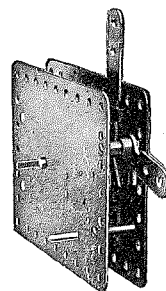

This strongly built and efficient Motor is fitted with a powerful spring that gives a long and steady run, and is exceptionally smooth in action. The Motor is provided with a conveniently placed brake lever by means of which it can be started and stopped. The Motor is of the non-reversing type ... .. Price **\$1.25**

## No. 1a CLOCKWORK MOTOR

This Motor is more powerful than the No. 1 Motor and is fitted with reversing motion. It has brake and reverse levers ... .. Price **\$2.00**

## No. 2 CLOCKWORK MOTOR

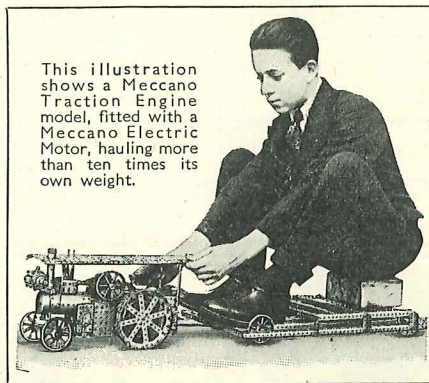

This is a Motor of super quality. Brake and reverse levers allow it to be started, stopped or reversed, as required ... .. Price **\$2.25**

## THE "MECCANO MAGAZINE"

The "Meccano Magazine" is essential to the full enjoyment of the Meccano hobby. A section of it is devoted to the Editor's replies to his readers' enquiries; the progress of Meccano clubs throughout the world is reported; and full details are given of the latest model-building achievements. In addition, a wealth of informative articles on such subjects of interest to boys as Aeronautics, Famous Engineers and Inventors, Stamps, Bridges, Cranes and Railways, is included in every issue. The publishing date is the first of each month. If you are not already a reader of the "M.M." write to the Editor, Binns Road, Liverpool, England, at once for full particulars, or order a copy from your Meccano dealer or from any newsagent.

# MECCANO ELECTRIC MOTORS—20-VOLT and 6-VOLT

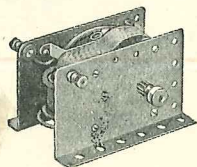

The six Meccano Electric Motors listed below have been designed specially to provide smooth-running power units for the operation of Meccano models. The special advantage of Meccano Electric Motors lies in the fact that they can be run continuously for long periods. If alternating current from the house mains is available, a Meccano 20-volt or 6-volt Electric Motor can be run cheaply and with perfect safety through a suitable Transformer (see page 33). If alternating current is not available, the alternative is to use a 6-volt Motor run from an accumulator. Both these methods are satisfactory, but the Transformer has the advantage that it can supply current continuously without attention.

This illustration shows a Meccano Traction Engine model, fitted with a Meccano Electric Motor, hauling more than ten times its own weight.

In almost every case reduction gearing is necessary with electric motors. Each Meccano Electric Motor is provided with a pinion on the armature shaft, and therefore Gears and Pinions provide the most suitable form of power transmission. Often it will be found necessary to employ several stages of reduction gearing, giving a ratio of about 9:1 or 27:1. If an exceptionally powerful drive is required, the ratio must be still further increased. The accompanying illustration of the Meccano Traction Engine gives some idea of the hauling power of a Meccano Electric Motor when suitably geared.

**No. E1 ELECTRIC MOTOR**  
(6-volt)

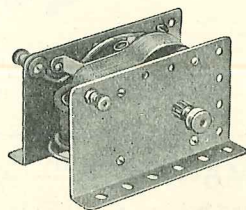

This highly efficient Motor (non-reversing) can be operated through a 9-volt Meccano Transformer from the mains (see page 33), providing that the supply is alternating current, or from a 6-volt accumulator.

Price ... .. \$2.00

**No. E2 Electric Motor (non-reversing).**  
Price ... .. \$2.25

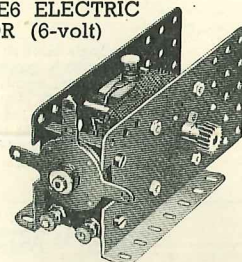

**No. E120 ELECTRIC MOTOR**  
(20-Volt)

The E120 Electric Motor is a very reliable and smooth-running power unit. It is operated through a Meccano 20-volt Transformer from alternating current supply mains (see page 33). The motor is non-reversing.

Price ... .. \$2.00

**No. E6 ELECTRIC MOTOR** (6-volt)

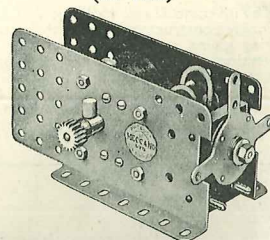

Fitted with reversing motion and with starting and stopping controls. Operated through a 9-volt Meccano Transformer from the mains (see page 33) providing that the supply is alternating current, or from a 6-volt accumulator.

Price ... .. \$4.25

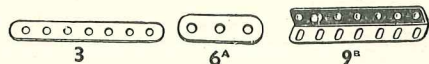

**No. E4 Electric Motor (reversing).**  
Price ... .. \$4.00

**No. E20b ELECTRIC MOTOR**  
(20-volt)

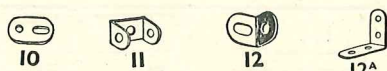

This 20-volt Electric Motor is an extremely efficient power unit, fitted with reversing motion and provided with stopping and starting controls. It is operated through a Meccano 20-volt Transformer from alternating current supply mains (see page 33).

Price ... .. \$4.50

*The magnificent Hornby scale-model L.M.S. Locomotive "Princess Elizabeth," in the shadow of its giant prototype. The model is being examined by Driver T. J. Clarke, who was in charge of the real "Princess Elizabeth" when it ran from Glasgow to London, 401.4 miles at an average speed of 70 m.p.h., a world record for long-distance non-stop steam travel.*

# HORNBY TRAINS

## ELECTRIC AND CLOCKWORK

Playing the great game of railways with Hornby Trains is the best fun in the world. The Hornby Railway system includes everything that is required to reproduce in miniature almost all the operations that are carried out day by day by the real railways. There are Locomotives, Coaches and Wagons finished in the colours of your own favourite group, so that you can reproduce a section of this in miniature.

The Hornby Electric Locomotives fitted with Automatic Reverse can be controlled completely from the side of the track. Think of the glorious fun this makes possible—starting, stopping, controlling

for speed and reversing your trains without any need to touch the Locomotive at all! There are other Electric Locomotives at a lower price, just as good, except that they are reversed from the cab.

Then there are Clockwork Locomotives of every type, splendid models that run a great distance on one winding and have astonishing hauling power. All of them can be braked from the cab, or from the track, by means of a suitable brake rail.

The Locomotives can be obtained separately, or in the splendid Train Sets that include a Locomotive, Rolling Stock and Rails. There are also the Complete Model Railway Outfits, each a miniature railway system in itself, with Locomotive, Coaches, Track, and Accessories such as Signals, Signal Cabin, Station, Level Crossing, Tunnel, Footbridge, etc.

In this Catalogue are described all the items in the fascinating Hornby range. They are of all prices. Read through every page carefully, and decide what you need to start the greatest hobby in the world!

Gauge O, 1½ in.

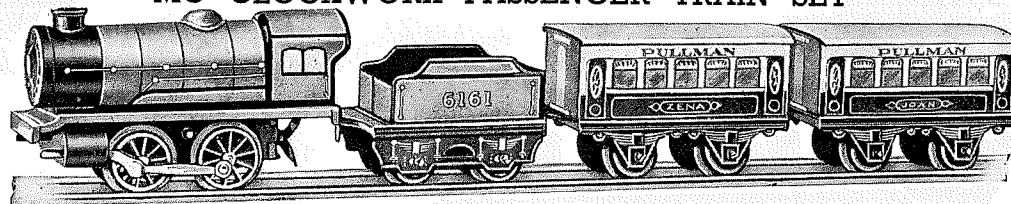

## HORNBY TRAINS

### MO CLOCKWORK GOODS TRAIN SET

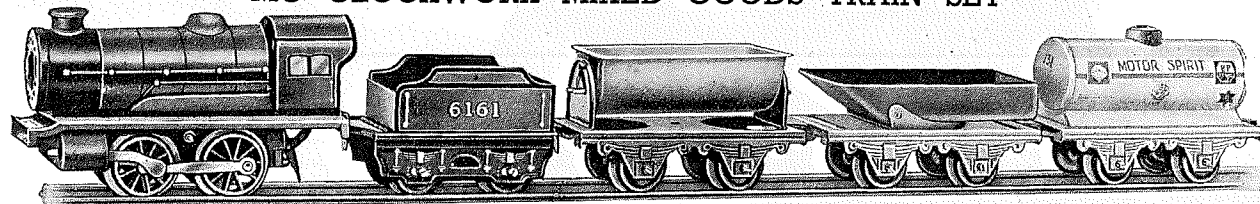

Locomotive (non-reversing) and Tender, available in red or green, two Wagons, five M9 Curved Rails and an MB9 Curved Brake Rail. Space required—2ft. square. Price **\$1.50**

### MO CLOCKWORK PASSENGER TRAIN SET

Locomotive (non-reversing) and Tender, available in red or green, two Pullman Coaches, five M9 Curved Rails and an MB9 Curved Brake Rail. Space required—2ft. square. Price **\$1.70**

### MO CLOCKWORK MIXED GOODS TRAIN SET

Locomotive (non-reversing) and Tender, available in either red or green, Side Tipping Wagon, Rotary Tipping Wagon, Petrol Tank Wagon, five M9 Curved Rails, two BM Straight Rails and an MB9 Curved Brake Rail. Space required—2ft. 9in. by 2ft. ... .. Price **\$2.00**

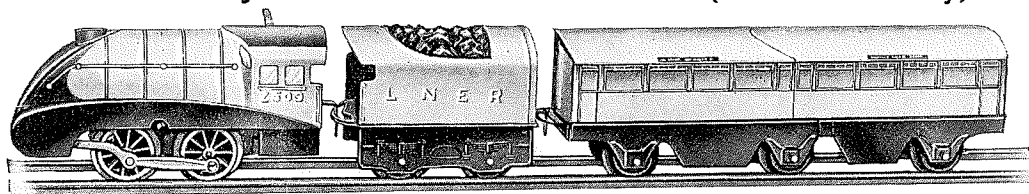

*The components of the above Train Sets can be purchased separately at the following prices:—*

MO Locomotive, non-reversing (without Tender) ... ..	Price <b>75 cents</b>	MO Tender ... ..	Price <b>12 cents</b>	MO Petrol Tank Wagon ... ..	Price <b>25 cents</b>
MO Pullman Coach ... ..	Price <b>20 cents</b>	MO Wagon ... ..	Price <b>12 cents</b>	MO Rotary Tipping Wagon ... ..	Price <b>25 cents</b>
MO Side Tipping Wagon ... ..	Price <b>25 cents</b>	For prices of MO Rails and Points (9 in. radius) see page 49.			

## HORNBY TRAINS

### No. O 'SILVER JUBILEE' TRAIN SET L.N.E.R. (Clockwork only)

Gauge O, 1½in

Streamline Locomotive "Silver Link" (non-reversing) and Tender, finished in silver and grey, Articulated Saloon Coach, five M9 Curved Rails and an MB9 Curved Brake Rail by means of which the train can be braked from the track. Space required—2ft. square ... .. Price **\$2.25**

### No. O STREAMLINE TRAIN SET (Clockwork only)

Similar in design to, and having the same contents as, the No. O "Silver Jubilee" Train Set, illustrated and described above. Finished in two different colour schemes, maroon/cream and light green/dark green, and without lettering ... .. Price **\$2.25**

*The components of the above train sets are obtainable separately at the following prices :—*

## HORNBY ELECTRIC TRAINS

Hornby Electric Trains are of two types—Mains Operated and Battery Operated. The chief features of these Trains are set out in brief below.

**MAINS-OPERATED TRAINS.** Where the house lighting supply is Alternating Current, power is obtained through a Transformer, which reduces the high voltage of the mains to a low voltage that is safe and economical. This is an essentially safe method of operating the miniature electric railway, for there is no direct connection between the mains supply and the railway system, and therefore no risk of shock.

All the Meccano Transformers are scientifically designed and perfectly constructed, and they comply fully with the requirements of the British Standards Institution. To ensure absolute safety the insulation of every Meccano Transformer is tested at a pressure of 2,000 volts.

Details of suitable Transformers are given on page 33.

The Hornby 6-volt EPM16 Special Tank Locomotive (permanent magnet type) cannot be run from a Transformer as it requires Direct Current. This

locomotive can be operated from Alternating Current supply mains by means of the Hornby Transformer-Rectifier, which is connected up in a similar manner to a Transformer.

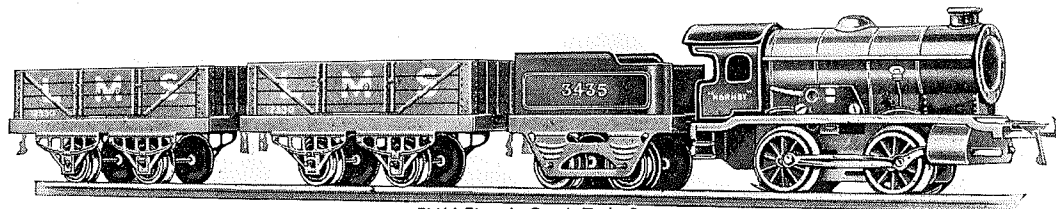

Direct Current Mains Supply must not be used to run Hornby model Electric Locomotives. Any attempt to do so by direct connection is dangerous owing to the risk of shock to which the operator is exposed.

**BATTERY-OPERATED TRAINS.** Where Alternating Current mains supply is not available, an accumulator must be used as the source of power. Every Hornby 6-volt Locomotive and Train can be run from a 6-volt accumulator.

It often happens that, after a Hornby 6-volt battery-operated railway has been purchased on account of the mains supply being Direct Current, the supply is changed over to Alternating Current. In such a case a Meccano Transformer makes it possible to operate the railway from the mains.

# HORNBY TRAINS

Gauge O, 1 1/4 in. EM120 and EM16 ELECTRIC and M1 CLOCKWORK GOODS TRAIN SETS

EM16 Electric Goods Train Set

## 20-VOLT AND 6-VOLT ELECTRIC

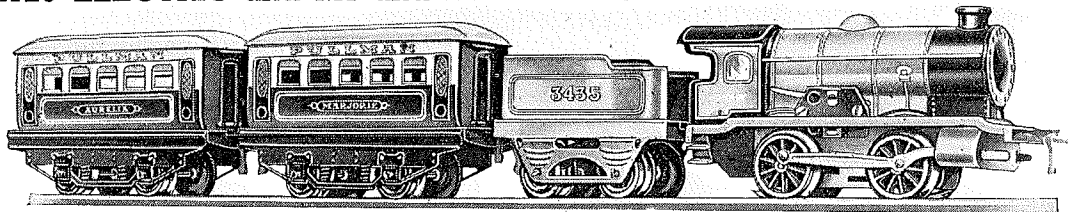

**EM120 (20-volt).** Locomotive (non-reversing) and M1/2 Tender, available in red or green, two M1 Goods Wagons (lettered L.M.S., N.E., G.W. or S.R.), six EA1 Curved Rails, one EB1 Straight Rail and one EMC20 Switch Rail by means of which the train can be started or stopped. Space required—3ft. 3in. by 2ft. 6in. ... Price **\$4.50**

**EM16 (6-volt).** This Set is similar to the EM120 Set except that the locomotive is fitted with a 6-volt motor and an EMC6 Switch Rail is included ... Price **\$4.50**

## CLOCKWORK

**M1 (Clockwork).** Locomotive (reversing) and M1/2 Tender, available in either red or green, two M1 Goods Wagons (lettered L.M.S., N.E., G.W. or S.R.), six A1 Curved Rails, one B1 Straight Rail and one BB1 Straight Brake Rail by means of which the Train can be braked from the track. Space required—3ft. 3in. by 2ft. 6in. ... Price **\$2.75**

# EM120 ELECTRIC and M1 and M2 CLOCKWORK PASSENGER TRAIN SETS

EM120 Electric Passenger Train Set

## 20-VOLT ELECTRIC

**EM120 (20-volt).** Locomotive (non-reversing) and M1/2 Tender, available in either red or green, two M1 Pullman Coaches, six EA1 Curved Rails, one EB1 Straight Rail and one EMC20 Switch Rail by means of which the train can be started or stopped. Space required—3ft. 3in. by 2ft. 6in. ... Price **\$4.50**

## CLOCKWORK

**M1 (Clockwork).** Locomotive (reversing) and M1/2 Tender, available in either red or green, two M1 Pullman Coaches, six A1 Curved Rails, one B1 Straight Rail and one BB1 Straight Brake Rail by means of which the Train can be braked from the track. Space required—3ft. 3in. by 2ft. 6in. ... Price **\$2.75**

**M2 (Clockwork).** This Set is similar to the M1 Clockwork Passenger Set except that it has three M1 Pullman Coaches and two extra B1 Straight Rails. Space required—4ft. 3in. by 2ft. 6in. ... Price **\$3.25**

*The components of the Train Sets on this page are obtainable separately at the following prices:—*

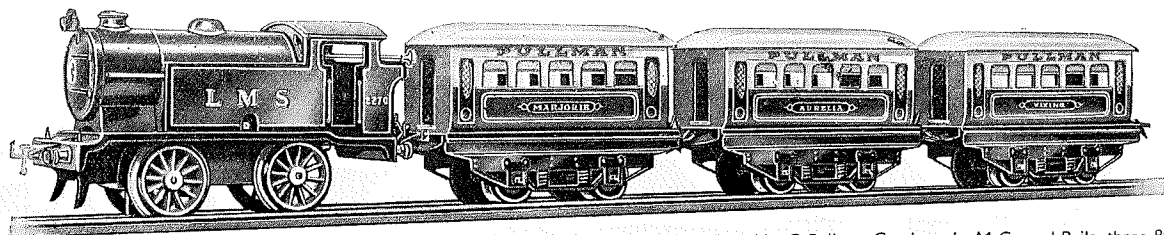

EM120 or EM16 Electric Locomotive, non-reversing (without Tender)	Price <b>\$2.25</b>	M1/2 Clockwork Locomotive, reversing (without Tender), for M1 and M2 Clockwork Train Sets	Price <b>\$1.20</b>
M1 Wagon	Price <b>25 cents</b>	M1/2 Tender	Price <b>20 cents</b>
		M1 Pullman Coach	Price <b>25 cents</b>

The prices of Hornby Rails, Points and Crossings are given on pages 48 and 49. For particulars and prices of Transformers see page 33

# HORNBY TRAINS

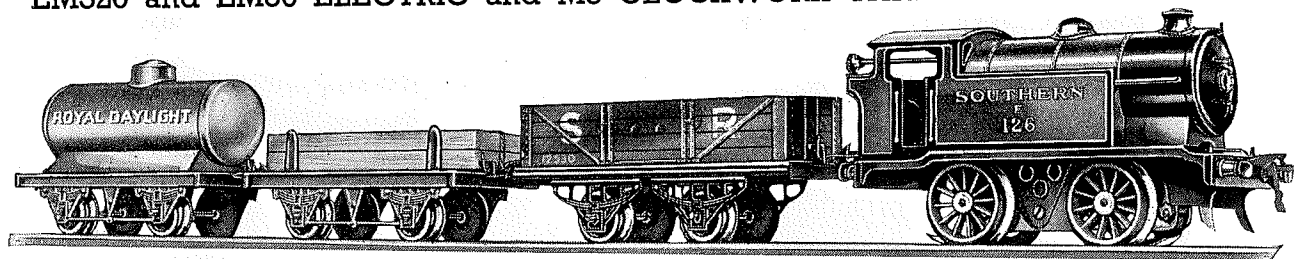

## M3 TANK PASSENGER TRAIN SET (Clockwork only)

Gauge O, 1½in.

**M3 (Clockwork).** Tank locomotive (reversing), available in L.M.S.R., L.N.E.R., G.W.R., and S.R. colours, three No. O Pullman Coaches, six A1 Curved Rails, three B1 Straight Rails and one BB1 Straight Brake Rail by means of which the Train can be braked from the track. Space required—4ft. 3in. by 2ft. 6in. ... .. Price **\$4.25**  
*The components of the above Train Set can be purchased separately. For prices see foot of this page.*

## EM320 and EM36 ELECTRIC and M3 CLOCKWORK TANK GOODS TRAIN SETS

EM36 Electric Tank Goods Train Set

### 20-VOLT AND 6-VOLT ELECTRIC

**EM320 (20-volt).** Tank Locomotive (reversing) with electric headlamp, available in L.M.S.R., L.N.E.R., G.W.R., and S.R. colours, one Goods Wagon, one Timber Wagon, one Oil Tank Wagon, six EA1 Curved Rails, two EB1 Straight Rails and one Terminal Connecting Plate. Space required—3ft. 3in. by 2ft. 6in. ... .. Price **\$7.25**

**EM36 (6-volt).** This Set is similar to the EM320 Set except that the locomotive is fitted with a 6-volt motor ... .. Price **\$7.25**

### CLOCKWORK

# HORNBY TRAINS

## HORNBY 20-VOLT ELECTRIC LOCOMOTIVES WITH AUTOMATIC REVERSE

The locomotives of the 20-volt Electric Train Sets featured in this and the following pages have motors that can be reversed automatically by remote control. Complete control, including reversing, starting and stopping, and speed regulation is thus afforded without any necessity for touching the trains. The locomotives have also a cut-out lever in the cab, which permits them to be reversed by hand if desired, or alternatively allows the automatic reverse to be put out of action. As reversing by remote control is effected automatically by switching off the current and then switching it

rapidly on again, the use of the T20 or T20A Transformers (see page 33) is strongly advised for these locomotives. Each of these Transformers is fitted with a speed regulator which is arranged with the stud giving maximum current next to the "off" stud in order to facilitate the reversing movement. The T20M Transformer can be used, but this has no speed regulator, so that a Resistance Controller has to be used in conjunction with it. This also applies to the T22M Transformer that is capable of operating two trains at once.

HORNBY TRAINS

# *"Princess Elizabeth"*

20-VOLT ELECTRIC LOCOMOTIVE WITH TENDER—AUTOMATIC REVERSING

This is a magnificent Hornby scale model of the L.M.S.R. 4-6-2 "Princess Elizabeth" locomotive that made a world record for non-stop steam travel in covering the 401.4 miles from Glasgow to London at an average speed of 70 m.p.h. It includes all the main features of the actual engine—massive six-coupled driving wheels, outside cylinders and motion, tapered boiler and fire-box, oval-headed buffers at the front, accurate internal details of cab and tender and Royal nameplate. The boiler fittings are characteristic; the sturdy chimney and squat dome, the top-feed apparatus, the dwarf safety valve columns and horizontal hooter all follow the real ones very closely.

The new Hornby 20-volt automatic reversing motor that is fitted ensures abundant power and makes "Princess Elizabeth" the ideal engine for the fastest and heaviest trains. The remarkable efficiency and fine appearance of the model appeal to all who see it. Driver Clarke of the real "Princess Elizabeth" has seen the Hornby model and says "It's fine!"

The enamelling and lining follows L.M.S.R. practice faithfully, and the general finish is of the highest Hornby quality.

Price, complete with tender, in special presentation box.

**\$35.00**

To make up a suitable train for the "Princess Elizabeth" Locomotive the No. 2 Corridor Coaches L.M.S.R., featured on page 37, should be used.

## QUALITY FEATURES OF "PRINCESS ELIZABETH" MOTOR

- |  |   |  |
|--|---|--|
| <p>1. FIELD.—Constructed of electrical steel laminations, and scientifically designed to obtain maximum power.</p> <p>2. DRIVING WHEELS.—Accurately pressure diecast to give maximum adhesion and smooth running.</p> <p>3. GEARS.—All gears machine cut.</p> <p>4. BEARINGS.—All bearings are of phosphor bronze.</p> | <p>5. ARMATURE.—Of laminated electrical steel mounted on a shaft machined from specially selected high grade steel.</p> <p>6. SIDEPLATES.—Hard rolled brass, rigidly connected by turned pillars.</p> <p>7. COMMUTATOR.—Constructed with hard copper segments moulded into a Bakelite body.</p> | <p>8. BRUSH HOLDERS.—Of brass, rigidly mounted on Bakelite moulded brackets.</p> <p>9. BRUSHES.—Of self-lubricating Morganite Carbon.</p> <p>10. REVERSING SWITCH.—Bakelite moulded switch barrel with bronze contact springs. Working parts of the automatic mechanism are case hardened.</p> |

# HORNBY ELECTRIC LOCOMOTIVES

Hornby 20-volt Locomotives are designed to run from the mains supply (Alternating Current) through a 20-volt Transformer capable of supplying 1 amp. at 20 volts. The 6-volt Locomotives may be operated either from a 6-volt accumulator, or (with the exception of the EPM16 Special Tank) through a Transformer capable of supplying 2.5 amps. at 9 volts direct from the mains supply (Alternating Current).

# TRANSFORMERS, RESISTANCE CONTROLLER AND CIRCUIT BREAKER

Meccano Transformers provide a convenient and safe means of driving 6-volt or 20-volt Train Sets and Electric Motors from the mains supply where this is Alternating Current.

All Meccano Transformers, and the Hornby Transformer-Rectifier, are available for the following Alternating Current supplies :—100/110 volts, 50 cycles ; 200/225 volts, 50 cycles ; 225/250 volts, 50 cycles. They can be specially wound for other supplies. **In ordering a Transformer or a Transformer-Rectifier the voltage and frequency of the supply must be stated.** These particulars are given on the supply meter.

## No. T20A TRANSFORMER

(Output 35 VA at 20/3½ volts) for 20-volt Trains or 20-volt Electric Motors. Fitted with speed regulator and output sockets for lighting fourteen 3½-volt lamps ... .. Price **\$8.50**

## No. T20 Transformer

(Output 20 VA at 20 volts) for 20-volt Trains or 20-volt Electric Motors. Fitted with speed regulator. Price **\$6.50**

## No. T20M Transformer

(Output 20 VA at 20 volts) for 20-volt Trains or 20-volt Electric Motors. This is similar to No. T20, but is not fitted with speed regulator. Price **\$4.75**

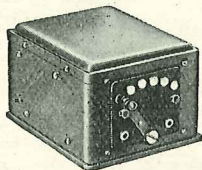

## No. T22M Transformer

(Output 50 VA at 20 volts) for 20-volt Trains. Not fitted with speed regulator. Will operate two trains at the same time, either on the same track or on two separate tracks. In the latter case two Resistance Controllers are necessary to give independent control. Price **\$5.25**

## No. T6A TRANSFORMER

(Output 40 VA at 9/3½ volts) for 6-volt Trains or 6-volt Electric Motors. Fitted with speed regulator and separate circuit for supplying current for eighteen 3½-volt lamps. Price **\$8.50**

## No. T6 TRANSFORMER

(Output 25 VA at 9-volts) for 6-volt Trains or 6-volt Electric Motors. Fitted with speed regulator. Price **\$6.50**

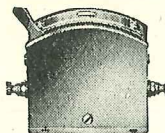

## No. T6M Transformer

(Output 25 VA at 9-volts) for 6-volt Trains or 6-volt Electric Motors. This is similar to No. T6 but is not fitted with a speed regulator. Price **\$4.75**

## No. T26M Transformer

(Output 50 VA at 9-volts) for 6-volt Trains. Not fitted with speed regulator. Will operate two trains at the same time either on the same track or on two separate tracks. In the latter case two Resistance Controllers are necessary to give independent control ... .. Price **\$5.25**

## RESISTANCE CONTROLLER

Where a Hornby 6-volt Train or Meccano 6-volt Electric Motor is operated from a Meccano No. T6M or No. T26M Transformer, or an accumulator, or a Hornby 20-volt Train or Meccano 20-volt Electric Motor from a Meccano No. T20M or No. T22M Transformer, a Meccano Resistance Controller is required to control and regulate the speed of the Motor or Train.

Meccano Resistance Controller, 6-volt or 20-volt ... Price **\$1.25**

**No. TR6 Transformer-Rectifier** (Output 6 volts at 1½ Amps.) for use with Hornby EPM16 Special Tank Locomotive (6-volt Permanent Magnet) ... Price **\$11.00**

## CIRCUIT BREAKER

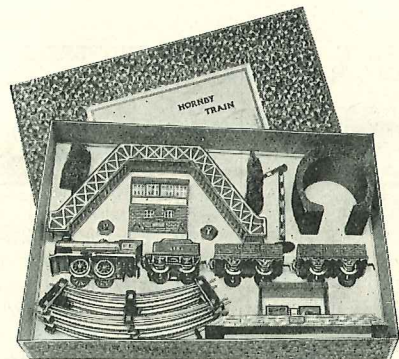

This automatic Circuit Breaker for Hornby Electric Railways does away with the necessity for the renewal of the fuse wire. If a short circuit occurs, the Circuit Breaker automatically disconnects the power supply from the track. When the cause of the trouble has been removed, the circuit is instantly restored by simply pressing a button.

The Circuit Breaker is suitable for both 20-volt and 6-volt trains ... Price **\$1.00**

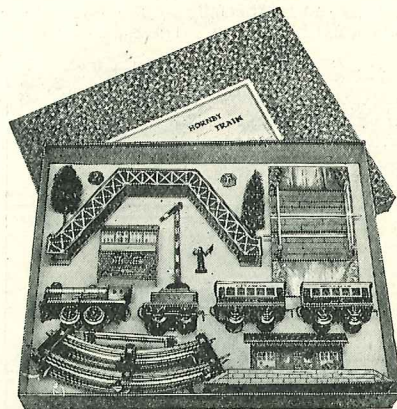

# HORNBY COMPLETE MODEL RAILWAYS

## M8 COMPLETE MODEL RAILWAY

Consists of a fine non-reversing Locomotive that can be braked from the track, Tender, two Goods Wagons and Set of Rails; Wayside Station, Footbridge, a Signal and Signal Cabin, two Trees with Stands and Tunnel. Packed in a strong carton as illustrated. Price **\$3.00**

## M9 COMPLETE MODEL RAILWAY

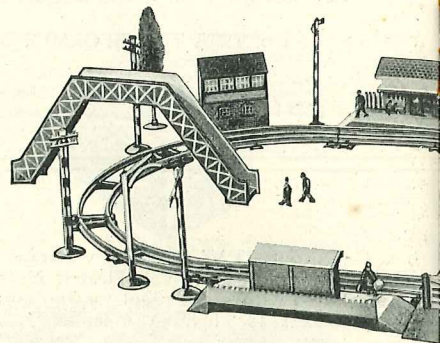

This Set includes a non-reversing Locomotive that can be braked from the track, Tender, two Passenger Coaches and Set of Rails; Station, Footbridge, Signal and Signal Cabin, Level Crossing, Guard, Porter, two Trees with Stands and two Hikers. Packed in a strong carton as illustrated. Price **\$3.75**

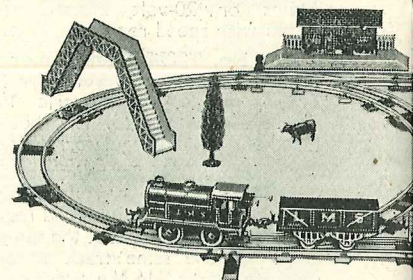

### HOW TO GET MORE FUN

While each of the Hornby M8, M9, M10 and M11 Train Sets is a complete model railway in itself, greater fun can be obtained by the addition of extra rails and other items from the Hornby range. Full details of the complete range of Hornby Trains, Rolling Stock, Accessories and Rails are given in this catalogue.

These fine Model Railway Sets provide a fascinating Hornby Railway hobby. Unleash your imagination, add the accessories as shown in the illustration or wagons on the track, and begin to run in the world!

This illustration shows a suitable arrangement for the M8 set.

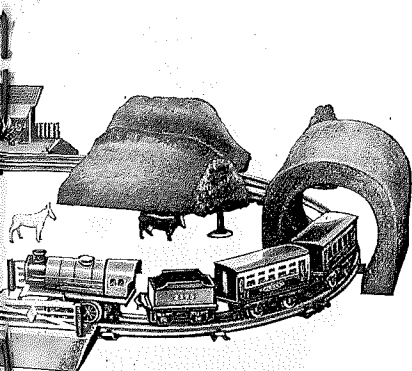

This illustration shows a suitable arrangement for the M9 set.

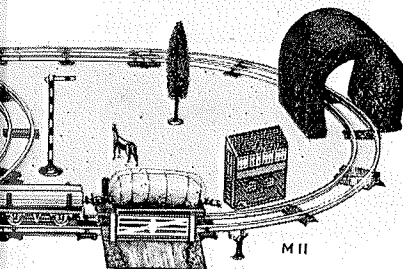

side the simplest way of beginning the pack the box, then lay out the rails and provided, put the locomotive and coaches on your own railway ! It's the greatest

## HORNBY COMPLETE MODEL RAILWAYS

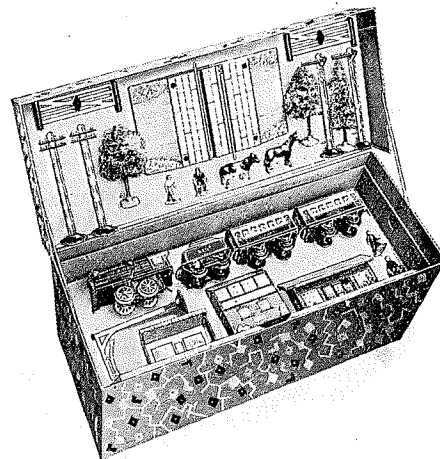

### M10 COMPLETE MODEL RAILWAY

ment of the M10 Complete Model Railway.

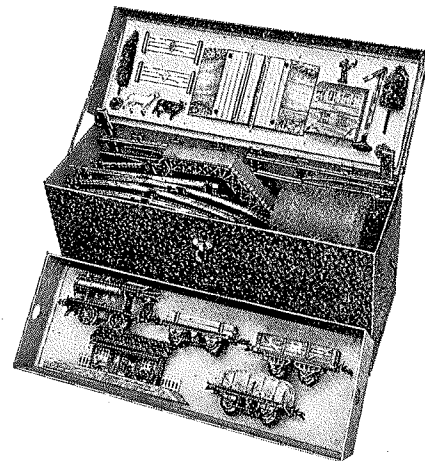

ent of the M11 Complete Model Railway.

A larger Set containing a non-reversing Locomotive that can be braked from the track, Tender, two Pullman Coaches and Set of Rails ; Footbridge, two Stations, Signal Cabin and two Signals, two Telegraph Poles, Loading Gauge, Tunnel, Cutting, Level Crossing, three Trees with Stands, two Porters, two Hikers, Horse and Cow. The Set is packed in an attractive special cabinet as illustrated.

Price **\$6.00**

### M11 COMPLETE MODEL RAILWAY

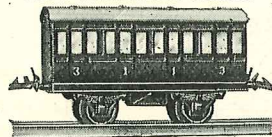

This is the largest and best of the Complete Model Railway Sets. It includes a powerful reversing Tank Locomotive that can be braked from the track, Fibre Wagon, Timber Wagon, Open Wagon and Set of Rails and Points ; Tunnel, Station, Signal and Signal Cabin, Level Crossing, Footbridge, two Trees with Stands, Guard, one Cow and one Horse. The Set is packed in a strong special cabinet as illustrated.

Price **\$7.50**

M Telegraph Pole No. 1. Price **8 cents** M Wayside Station. Price **20 cents**

## THE HORNBY CONTROL SYSTEM. MORE FUN—MORE THRILLS

There is a certain amount of fascination about even the cheapest and simplest Miniature Railway. For a time we can take a keen interest in a single train running round a plain oval track. Then we add points and crossings and so make possible layouts with branch lines and sidings. Still later, we add further interest by introducing a more or less complete system of signals.

Our thoughts then turn to the Signal Cabin on a real railway, and we wish that, like the signalman, we could control the operation of our railway by means of levers enabling us to manipulate signals and points. The Hornby Control System has been specially devised for the fulfilment of this desire.

The Control System is easy to instal on our Hornby Railway, and once it is in operation we are able to control points and signals from one central point, namely, the Signal Cabin. Our railway thus makes a tremendous advance in realism and the possibilities of fun are now unlimited.

Ask your dealer for the free illustrated price list that tells all about the Hornby Control System.

## ACCESSORIES FITTED FOR ELECTRIC LIGHTING

The Hornby Accessories fitted for Electric Lighting make possible a new development in realism. By means of them, Stations, Engine Sheds, Signal Cabins and Goods Platforms can be lighted up, and goods yards and sidings illuminated by Lamp Standards. The various Signals can be made to show their red and green or yellow and green lights, and red lamps fitted to Buffer Stops and Level Crossing Gates will show their warning as in actual practice. No Hornby railway is complete without some of these Accessories.

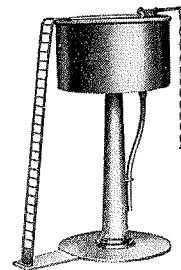

The following is a complete list of the Hornby Accessories that are available fitted for Electric Lighting. They are specially designed for lighting from the 3 1/2-volt circuit of a Meccano T20A or T6A Transformer, and with each of these Transformers are packed for the purpose a pair of Plugs, a Bonding Clip and a coil of Wire, together with full instructions. For use with clockwork railways the Accessories can be lighted from an accumulator, or if necessary from dry batteries. Each Accessory is accompanied by a Bonding Clip and a leaflet giving full instructions for use. Lamp bulbs are not provided with the Accessories.

# HORNBY RAILWAY ACCESSORIES

## ISLAND PLATFORM

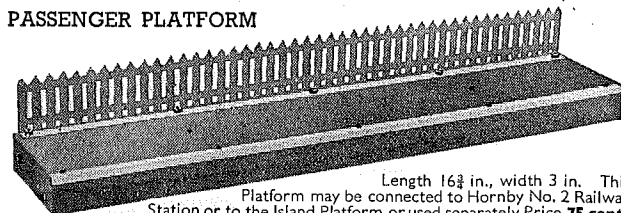

Length  $32\frac{1}{2}$  in., height  $6\frac{1}{2}$  in.,  
width 3 in. Price **\$1.75**  
The Ramps can be purchased  
separately. Price, pair **45 cents**

## ISLAND PLATFORM E

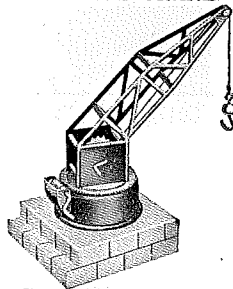

This platform is suitably wired for electric  
lighting. Otherwise it is the same as the Island Platform illustrated above.  
Price **\$2.00**

## PASSENGER PLATFORM

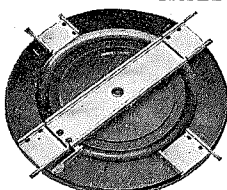

Length  $16\frac{1}{2}$  in., width 3 in. This  
Platform may be connected to Hornby No. 2 Railway  
Station or to the Island Platform or used separately Price **75 cents**  
The white Paled Fencing can be purchased separately Price per length **15 "**

## PLATFORM CRANE

Fitted with a crank handle  
and ratchet mechanism, also  
gear for rotating crane.  
Price **\$1.00**

## No. 1 TURNTABLE

Price **65 cents**

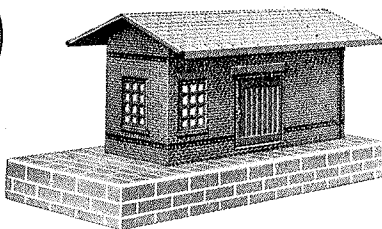

## No. 2 TURNTABLE

Price **\$1.00**

## No. E2 TURNTABLE (Electrical)

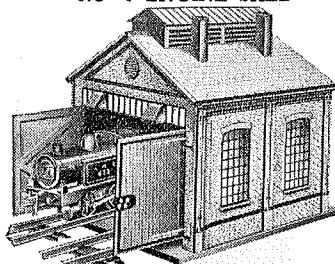

Similar to No. 2 Turntable, but  
fitted with electrical rails.  
Price **\$1.50**

## No. 1 GOODS PLATFORM

Length 13 in., height  $6\frac{1}{2}$  in., width 6 in.  
Price **\$2.25**

## No. 1 ENGINE SHED

This Shed will accommodate any Loco-  
motive and Tender with an overall length not  
exceeding  $8\frac{1}{2}$  in. It has double doors at each  
end. Price **\$4.50**

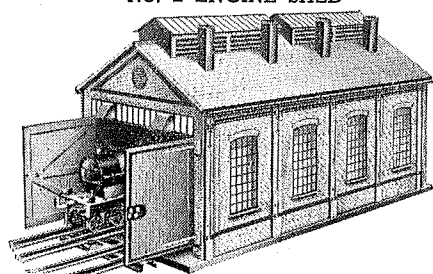

## No. E1E ENGINE SHED

Similar to No. 1 Engine Shed but wired for  
electric lighting. Provided with electrical  
track. Price **\$4.75**

## No. 1A ENGINE SHED

This Shed is of the same dimensions as the  
No. 1 Shed described above, but is of simpler  
design, and has doors at one end only.  
Price **\$3.25**

## No. 2 ENGINE SHED

This Shed will accommodate any Locomotive and  
Tender with an overall length not exceeding  $17\frac{1}{2}$  in.  
It has double doors at each end. Price **\$7.00**

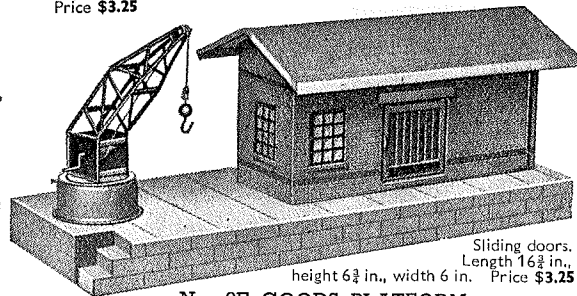

## No. E2E ENGINE SHED

Similar to No. 2 Engine Shed but wired for electric  
lighting. Provided with electrical track. Price **\$7.25**

## No. 2A ENGINE SHED

This Shed is of the same dimensions as the No. 2 Shed  
described above, but is of simpler design. Price **\$5.50**

## No. 2 GOODS PLATFORM

Sliding doors.  
Length  $16\frac{1}{2}$  in.,  
height  $6\frac{1}{2}$  in., width 6 in. Price **\$3.25**

## No. 2E GOODS PLATFORM

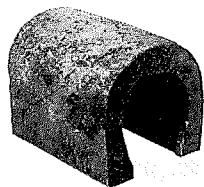

No. 2E Goods Platform is wired for electric lighting,  
it is the same as No. 2 Goods Platform, illustrated here. Price **\$3.50**

# HORNBY RAILWAY ACCESSORIES

## CUTTINGS

**No. 0 TUNNEL (Straight)**  
Base measurement—Length 6 in.  
Width 6 in. Price **40 cents**

**No. 1 TUNNEL (Straight)**

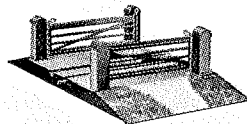

Base measurement—Length  $7\frac{1}{2}$  in.  
Width  $6\frac{1}{2}$  in. Price **50 cents**

**No. 2 TUNNEL (Straight)**

Base measurement—Length  $15\frac{1}{2}$  in.  
Width  $9\frac{1}{2}$  in. Price **\$1.00**

**No. 1 LEVEL CROSSING**

Suitable for a single track only.  
Price **90 cents**

**No. E1 LEVEL CROSSING (Electrical)**

Similar to No. 1 Level Crossing, but fitted with electrical track.  
Price **\$1.25**

**No. E1E LEVEL CROSSING**

Similar to No. E1 Level Crossing but fitted for electric lighting.  
Price **\$1.75**

**M LEVEL CROSSING**

Suitable for single track only.  
Price **40 cents**

**No. 3 TUNNEL (Curved)**

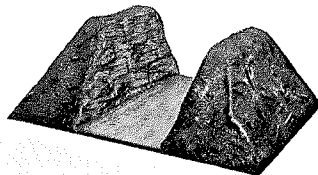

Base measurement—Length 13 in.  
Width  $9\frac{1}{2}$  in. For 1 ft. or 2 ft. radius track.  
Price **\$1.25**

**No. 4 TUNNEL (Curved)**

Base measurement—Length 20 in.  
Width  $9\frac{1}{2}$  in. For 2 ft. radius track only.  
Price **\$1.50**

**No. 0 CUTTING**

The base measurement of this Double Cutting is  $8\frac{1}{2}$  in. square.  
Price **50 cents**

**TUNNEL ENDS**

Tunnels of varying lengths can be made with cardboard or other material, and then completed with the Tunnel Ends.

Price per pair **35 cents**

## TRAIN NAME BOARDS

These Boards are specially intended for No. 2 Special Pullman Coaches, and No. 2 Corridor Coaches which are fitted with brackets to hold them. The Boards add greatly to the realistic appearance of the coaches. The following are available :

No. 1 The Flying Scotsman.  
No. 2 The Scarborough Flier.  
No. 3 The Royal Scot.  
No. 4 The Merseyside Express.  
No. 5 The Golden Arrow.  
No. 6 Bournemouth Belle.  
No. 7 Cornish Riviera Express.  
No. 8 Torbay Limited Express.

No. 9 King's Cross, York and Edinburgh.  
No. 10 King's Cross, Edinburgh and Aberdeen.  
No. 11 London (Euston) and Liverpool (Lime Street)  
No. 12 London (Euston) and Glasgow (Central).

No. 13 Victoria and Dover.  
No. 14 Waterloo, Salisbury and Exeter.  
No. 15 Paddington, Exeter and Plymouth.  
No. 16 Paddington and Bristol.  
Price per packet of four of a kind **10 cents**

The Train Name Boards can be fitted to No. 2 Pullman and Saloon Coaches and Metropolitan Coaches, if desired, by means of No. 2 Roof Clips. Price **25 cents** per packet of twelve.

Two No. 1 and one No. 2 Cuttings are illustrated above

**No. 1 CUTTING (END SECTION)**

Base measurement: Length  $7\frac{1}{2}$  in. Width 6 in.  
Price, per pair **90 cents**

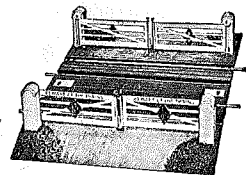

**No. 2 CUTTING (Centre Section, Straight)**

The addition of these centre sections allows a Hornby Railway Cutting to be extended to any length. They are intended to be used in conjunction with the End Sections (Cutting No. 1). Base measurement: Length  $10\frac{1}{2}$  in. Width 6 in. Price **60 cents**

**No. 3 CUTTING (Centre Section, Curved)**

This is used for curved track in the same manner as the straight Centre Section, described above, is used for straight track. It is suitable for both 1ft. and 2ft. radius track.  
Price **60 cents**

**No. 2 LEVEL CROSSING**

Measures  $13\frac{1}{2} \times 10\frac{1}{2}$  in. with two gauge O tracks in position.  
Price **\$1.50**

**No. E2 LEVEL CROSSING (Electrical)**

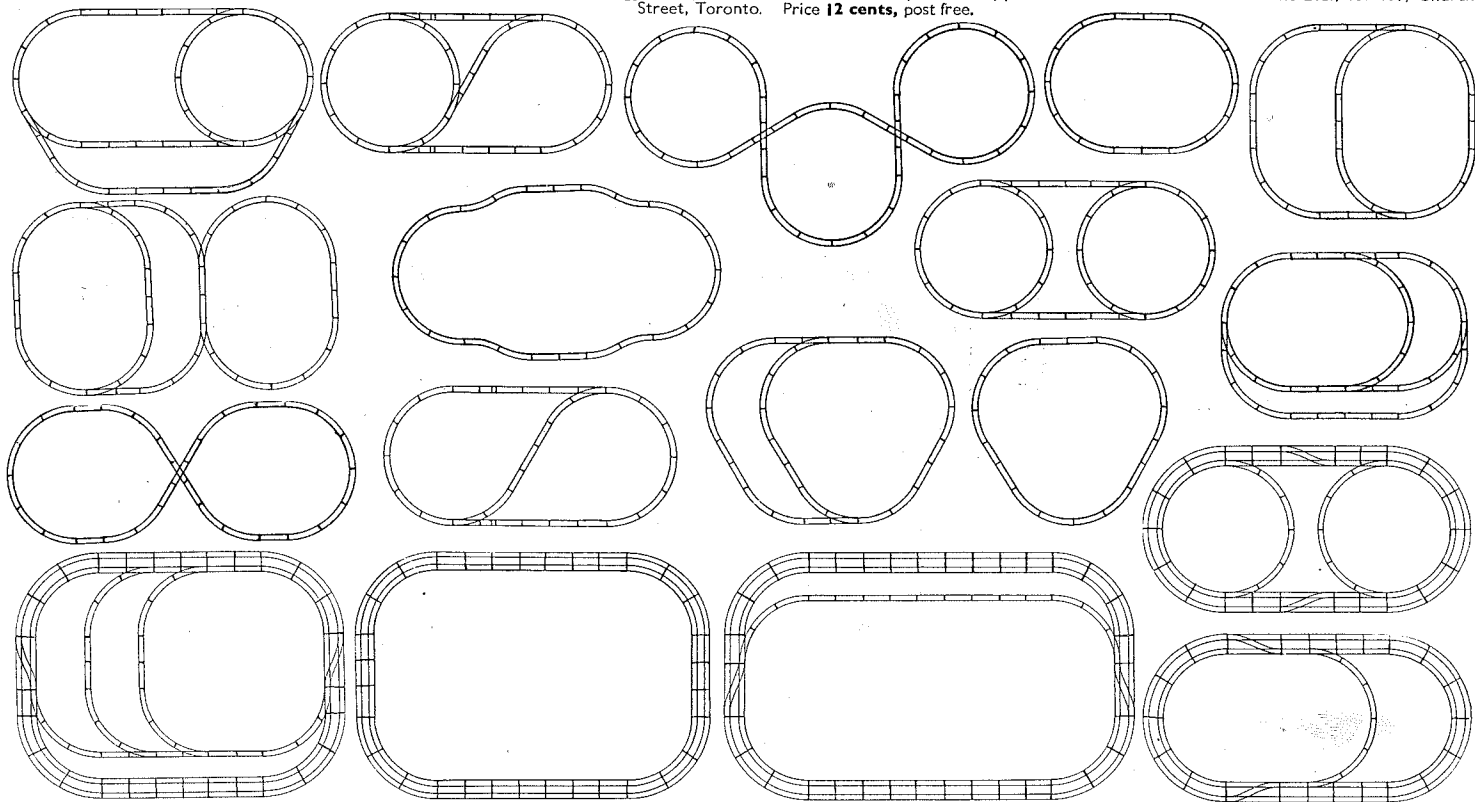

Similar to Level Crossing No. 2, but fitted with two electrical tracks.  
Price **\$2.25**

**No. E2E LEVEL CROSSING**

Similar to No. E2 Level Crossing, but fitted for electric lighting.  
Price **\$2.50**

## A PAGE OF INTERESTING HORNBY RAIL FORMATIONS

There is practically no limit to the number of rail formations that can be built with Hornby Tinplate Rails, Points and Crossings. The examples illustrated below are some of a large variety illustrated and described in the booklet "Hornby Layouts—One Hundred Suggestions," which is obtainable from your dealer, price **10 cents** or direct from Meccano Ltd., 187-189, Church Street, Toronto. Price **12 cents**, post free.

Hornby Rails, Points and Crossings can be purchased separately from any Meccano dealer. For list of prices see pages 48 and 49.

# HORNBY ELECTRIC RAILS, POINTS AND CROSSINGS

Gauge O, 1 1/4 in.

Hornby Tinplate Rails, Points and Crossings are designed to meet the most exacting requirements of model railway enthusiasts. Their adaptability is well shown in the booklets "How to Plan your Hornby Railway," and "Hornby Layouts—One Hundred Suggestions," each of which is obtainable from your dealer, price **10 cents**

Gauge O, 1 1/4 in.

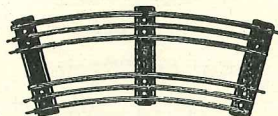

## CURVED RAILS

(1ft. and 2ft. radius)

EA2

- EA1 Curved rails (1ft. radius) per doz. **\$1.44**  
 EA2 Curved rails (2ft. radius) per doz. **\$1.44**  
 EA1 1/2 Curved half rails (1ft. radius) per doz. **\$1.20**  
 EA2 1/2 Curved half rails (2ft. radius) per doz. **\$1.20**  
 EA1 1/4 Curved quarter rails (1ft. radius) per doz. **96 cents**  
 EA2 1/4 Curved quarter rails (2ft. radius) per doz. **96 cents**

EDC2 Curved rails, Double Track (2ft. radius only). 1/2 doz. **\$2.40**

## SWITCH RAILS

EMC6

- EMC20 Switch rails (20-volt) each **35cents**  
 EMC6 Switch rails (6-volt) each **35** "

## TERMINAL CONNECTING PLATES

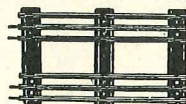

- TCP6 Terminal connecting plates (6-volt) each **30 cents**  
 TCP20 Terminal connecting plates (20-volt) each **30 cents**

## STRAIGHT RAILS

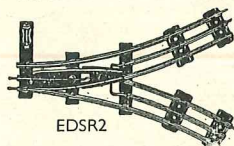

EB1

- EB1 Straight rails. per doz. **\$1.44**  
 EB 1/2 Straight half rails. per doz. **\$1.20**  
 EB 1/4 Straight quarter rails. per doz. **96 cents**

EDS1 Straight rails Double Track. 1/2 doz. **\$2.40**

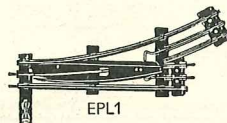

## DOUBLE SYMMETRICAL POINTS

EDSR2

- EDSR1 Double symmetrical points, right-hand (1ft. radius)  
 EDLS1 Double symmetrical points, left-hand (1ft. radius) per pair **\$1.60**  
 EDSR2 Double symmetrical points, right-hand (2ft. radius)  
 EDLS2 Double symmetrical points, left-hand (2ft. radius) per pair **\$2.00**

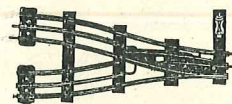

## POINTS

EPL1

- EPR1 Right-hand points (1ft. radius)  
 EPL1 Left-hand points (1ft. radius) per pair **\$1.75**  
 EPR2 Right-hand points, on solid base (2ft. radius)  
 EPL2 Left-hand points on solid base (2ft. radius). per pair **\$2.00**

## PARALLEL POINTS

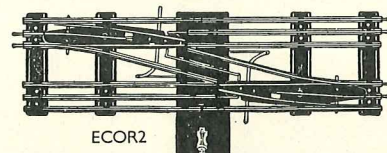

EPPL2

- EPPL2 Parallel points, right-hand.  
 EPPL2 Parallel points, left-hand. per pair **\$2.00**

The Parallel Points can be used with either 1ft. or 2ft. radius track.

## CROSSOVER POINTS

Crossover Points can be used in conjunction with Hornby Double Track Rails, for which they are specially suitable, or with ordinary single track rails.

ECOR2

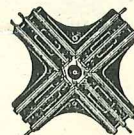

- ECOR2 Crossover points, right-hand.  
 ECOL2 Crossover points, left-hand. } per pair **\$7.00**

## ACUTE-ANGLE CROSSINGS

ECA Acute-angle crossings. each **75 cents**

## RIGHT-ANGLE CROSSINGS

ECR Right-angle crossings. each **75 cents**

ECA and ECR Crossings are used as illustrated for 2ft. radius layouts. For 1ft. radius layouts an EB 1/4 Straight Rail must be added to each arm.

Gauge O, 1 1/4 in.

# HORNBY CLOCKWORK RAILS, POINTS AND CROSSINGS

Gauge O, 1 1/4 in.

## CURVED RAILS

(1ft. and 2ft. radius)

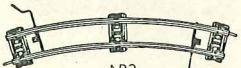

- A1 Curved rails (1ft. radius) per doz. **96 cents**  
 A2 Curved rails (2ft. radius) per doz. **96 cents**

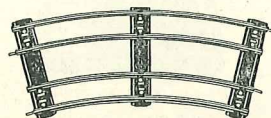

- A1 1/2 Curved half rails (1ft. radius) ... per doz. **72 cents**  
 A2 1/2 Curved half rails (2ft. radius) ... per doz. **72 cents**  
 A1 1/4 Curved quarter rails (1ft. radius) ... per doz. **60 cents**  
 A2 1/4 Curved quarter rails (2ft. radius) ... per doz. **60 cents**

- M9 Curved rails (9in. radius for MO Trains) per doz. **72 cents**

- AB1 Curved brake rails (1ft. radius) ... each **8 cents**  
 AB2 Curved brake rails (2ft. radius) ... each **8 cents**  
 MB9 Curved brake rails (9in. radius, for MO Trains) each **6 cents**

- DC2 Curved rails, Double Track (2ft. radius) ... 1/2 doz. **\$1.50**

## STRAIGHT RAILS

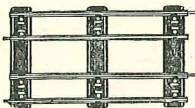

- B1 Straight rails. per doz. **96 cents**

- B1 1/2 Straight half rails. per doz. **72 cents**  
 B1 1/4 Straight quarter rails. per doz. **60 cents**

- BM Straight rails (for MO Trains) per doz. **72 cents**

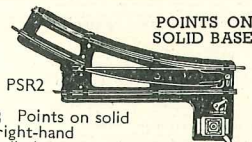

- DS1 Straight rails, Double Track ... 1/2 doz. **\$1.50**

- BB1 Straight brake rails. each **8 cents**

- BBR Straight brake and reverse rails. each **40 cents**

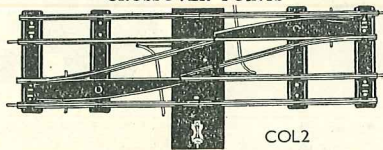

## POINTS ON SOLID BASE

- SPSR2 Points on solid base, right-hand (2ft. radius) per pair **\$1.25**  
 SPSSL2 Points on solid base, left-hand (2ft. radius). per pair **\$1.25**  
 PSR2 Points on solid base, right-hand (2ft. radius). With ground disc and lamp. per pair **\$2.25**  
 PSL2 Points on solid base, left-hand (2ft. radius). With ground disc and lamp. Fitted for Hornby Control. per pair **\$2.25**

## BRAKING AND REVERSING FROM THE TRACK

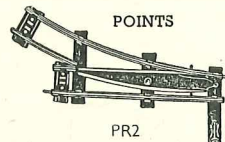

The MB9 Curved Brake Rail can only be used to brake the MO Locomotive. The BB1 Straight Brake Rail can only be used to brake the M1, M3 Tank, and No. O Locomotives. Their reversing gear must be operated by means of the lever in the cab. The AB2 Curved Brake Rail can only be used to brake or reverse the No. 1 Locomotives, both tender and tank. The BBR1 Brake and Reverse Rail is intended for braking or reversing the No. 1 Special, No. 2 Special, and No. 3C Locomotives.

## CROSSOVER POINTS

- COR2 Crossover points, right-hand (2ft. radius)  
 COL2 Crossover points, left-hand (2ft. radius) per pair **\$3.50**  
 Crossover Points may be used in conjunction with Hornby Double Track Rails, for which they are specially suitable, or with ordinary single track rails.

## POINTS

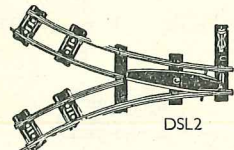

PR2

- PR1 Right-hand points (1ft. radius)  
 PL1 Left-hand points (1ft. radius) per pair **95 cents**  
 PR2 Right-hand points (2ft. radius)  
 PL2 Left-hand points (2ft. radius) per pair **95 cents**  
 MR9 Right-hand points (9in. radius, for MO Trains)  
 ML9 Left-hand points (9in. radius, for MO Trains) per pair **75 cents**

## DOUBLE

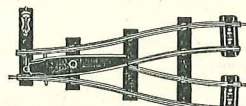

## SYMMETRICAL POINTS

DSL2

- DSR1 Double symmetrical points, right-hand (1ft. radius)  
 DSL1 Double symmetrical points, left-hand (1ft. radius) per pair **\$1.00**  
 DSR2 Double symmetrical points, right-hand (2ft. radius)  
 DSL2 Double symmetrical points, left-hand (2ft. radius) per pair **\$1.00**  
 RCP Rail connecting plates. 1/2 doz. **6 cents**

## PARALLEL POINTS

PPR2

- PPR2 Parallel points right-hand  
 PPL2 Parallel points left-hand per pair **\$1.00**

The above Parallel Points can be used with either 1ft. or 2ft. radius track.

## ACUTE-ANGLE CROSSINGS

Collecting Dinky Toys is one of the most fascinating of all hobbies. These realistic miniatures are unique in their rich colouring and perfection of design and finish, and their range is so wide as to appeal to all tastes.

This year, in addition to reducing the prices of many of the existing models and sets, we have introduced several new items, including wonderful scale models of military Tanks and Aeroplanes, latest types of Motor Cars, complete with driver and passenger, and many others.

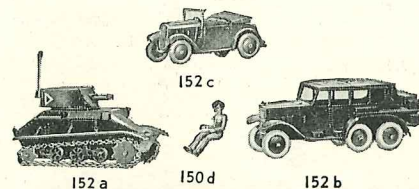

Every boy or girl who has not already done so should start this delightful collecting hobby to-day. All the models can be purchased either separately or in complete sets.

## DOLL'S HOUSE FURNITURE

The extension of the range of Dinky Toys to include true-to-scale Furniture has been welcomed by all who know the charm of these perfect miniatures. Each piece is based on a typical example of modern design, and all are actual scale models made to a scale of

7/16th of an inch to one foot. There is a tone and individuality of style about Dinky Toys Doll's House Furniture that cannot fail to appeal. Among the most attractive features are the opening doors and drawers.

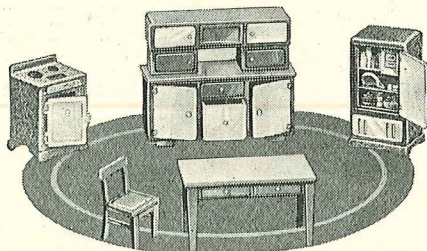

### DINING ROOM FURNITURE

# "DOLLY VARDEN" DOLL'S HOUSE

FOR DINKY TOYS FURNITURE

The Couch  
Hammock, Tennis  
Net, Garden Seats,  
Dinky Toys Garage,  
Motor Cars and  
Figures, and the Hornby  
Trees and Hedging  
featured in the illustration  
are not included with the  
Doll's House and Garden.

## DIMENSIONS OF "DOLLY VARDEN" DOLL'S HOUSE

The following are the overall dimensions of the "Dolly Varden" Doll's House when built up ready for play. Length, 1 ft. 6 $\frac{3}{4}$  in. Depth, 10 $\frac{1}{4}$  in. Height, 1 ft. 6 $\frac{3}{4}$  in.

The open container on which the house stands measures 3 ft. 3 $\frac{1}{2}$  in. by 2 ft. 5 $\frac{1}{2}$  in.

When the house is dismantled and packed in container, the overall dimensions of the complete parcel are  $\frac{3}{4}$  in.  $\times$  1 ft. 7 $\frac{1}{2}$  in.  $\times$  2 ft. 5 $\frac{1}{2}$  in.

This beautifully-designed Doll's House provides a perfect setting for the Dinky Toys Doll's House Furniture illustrated and described on the previous page.

The exterior of the house is designed to represent a half-timbered dwelling, while the interior decorations, which are printed in nine colours, are in an attractive modern style.

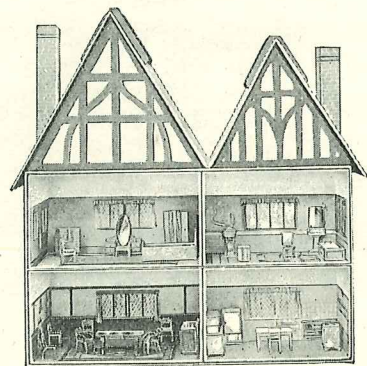

Reinforced leather board is the material of which the house is constructed, and although it is collapsible it is as strong as a wood structure when set up. The accompanying illustration shows the "Dolly Varden" Doll's House as it appears when erected. The container, which also is made of reinforced leather board, opens out to show a lovely garden, with tennis lawn, carriage drive and rockery. The garden provides an exquisite setting for play

with various Dinky Toys and Hornby Trees and Hedging. A Dinky Toys Garage can be placed alongside the house, and Dinky Toys

motor cars and people may be placed in suitable positions, as shown.

The arrangement of Dinky Toys Furniture shown in the illustration on the right is intended only as a suggestion. Great fun can be obtained from rearranging the various pieces in each room, perhaps on the lines of some familiar real rooms.

Price of "Dolly Varden" Doll's House ... **\$2.50**

This rear view of the "Dolly Varden" Doll's House shows the remarkable effectiveness of the Dinky Toys Furniture when set out in the rooms. A variety of interesting results can be obtained by rearrangement of the pieces.

# AEROPLANE CONSTRUCTOR OUTFITS

The Aeroplane Constructor Outfits described on this page and the following pages contain assortments of component parts by means of which boys can design and build their own aeroplanes. A large number of different models can be constructed simply by varying the positions of the parts, which

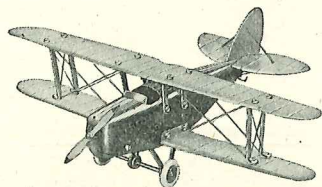

are all interchangeable on the famous Meccano principle. The parts in the Nos. 1 and 2 and the No. 1 Special and No. 2 Special Outfits can be used in conjunction with the standard Meccano parts.

## No. OO AEROPLANE OUTFIT

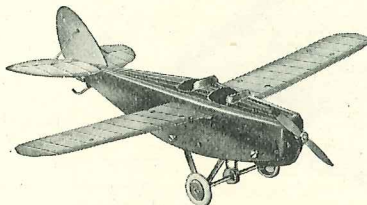

This excellent Outfit contains a good selection of Aeroplane Parts, with which delightful models of realistic appearance can be built. It is an ideal present for young boys who are keen on aeroplanes. Available in two colour schemes—red and cream, and blue and white. Price **\$1.00**

NOTE.—The parts in the No. OO Outfit are not suitable for use with those in the other Outfits in the series.

Model of a Biplane built with No. O Outfit

Model of a High Wing Monoplane built with No. O Outfit

## SPECIAL NOTE

Military Identification Markings are not now included in the No. O, No. 1 and No. 2 Aeroplane Constructor Outfits. Instead the large Mainplanes and the Fuselage carry civil registration letters. The Military Rudder is replaced by a Civil Rudder.

The Special Aeroplane Constructor Outfits No. 1 and No. 2 now have Commercial Mainplanes with civil registration letters, in addition to the plain Mainplanes and Military Identification Markings.

## No. O AEROPLANE OUTFIT

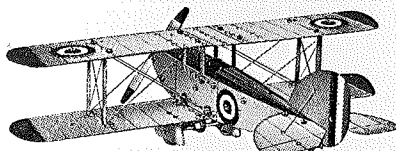

The parts contained in this Outfit make possible an interesting range of aeroplane models, including high and low wing monoplanes, seaplanes and standard light biplanes. The Outfit is supplied in two different colour combinations—red and cream, and blue and white ... .. Price **\$1.50**

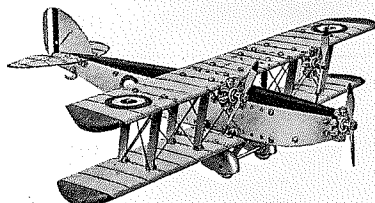

NOTE.—The parts in the No. O Outfit are not suitable for use with those in the other Outfits in the series.

# AEROPLANE CONSTRUCTOR OUTFITS

## No. 1 AEROPLANE OUTFIT

Model of Standard Light Biplane built with No. 1 Outfit

Model of a Triple-engined Air Liner built with No. 2 Aeroplane Outfit

## No. 2 AEROPLANE OUTFIT

Magnificent models of high and low wing mono-planes and interesting model biplanes representing standard types can be built with this Outfit. The biplanes include models based on the popular single-seater and two-seater types of light aeroplanes. The Outfit is supplied in two different colour combinations—red and cream, and blue and white.

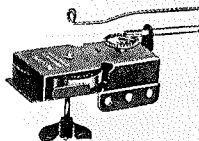

Price ... .. \$2.50

Aeroplane Constructor Accessory Outfit No. 1a, costing \$1.75 will convert a No. 1 Outfit into a No. 2.

### AERO CLOCKWORK MOTORS

#### No. 1 AERO CLOCKWORK MOTOR

This Motor is designed to fit into the fuselage of models made with No. 1, No. 2, No. 1 Special or No. 2 Special Aeroplane Outfits. It will rotate the propeller at high speed. Price **50 cents**

No. 1 Aero Clockwork Motor

#### No. 2 AERO CLOCKWORK MOTOR

In addition to rotating the propeller, this Motor also drives the landing wheels of No. 1, No. 2, No. 1 Special or No. 2 Special Aeroplane Outfit models. An Adjustable Tail Wheel is supplied with the Motor. Price **\$1.00**

A much wider range of models can be built with the parts contained in this Outfit, including triple-engined monoplanes and biplanes, and a racing seaplane of the type that was used in the Schneider Trophy Contests. A particularly interesting model is that of a giant flying boat, and there are also models of amphibians. The Manual of Instructions included in the No. 2 Outfit gives full details of how to build these wonderful models.

Price ... .. \$4.00

All Aeroplane Outfits are available in two different colour combinations—red and cream, or blue and white.

*See Special Note in reference to Identification Markings on previous page.*

NOTE :—No. 1 and No. 2 Aeroplane Outfit Parts can be purchased separately from any Meccano dealer.

# SPECIAL AEROPLANE CONSTRUCTOR OUTFITS

The Special Aeroplane Constructor Outfits have been designed with great care and thought to make possible the building of more realistic models of the latest types of aircraft. Each Outfit is available in two different colour combinations.

## No. 1 SPECIAL AEROPLANE OUTFIT

The parts in this super Aeroplane Outfit will build over 20 realistic models of different types of aircraft. The range of special parts includes mainplanes fitted with ailerons, tail planes with elevators, movable rudder, radial engine cowling, etc.

The Outfit is available in two different colour combinations—red and cream, and blue and white.

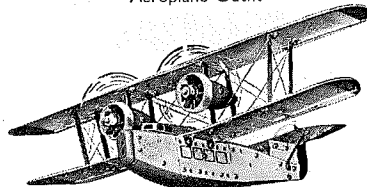

Price ... .. **\$4.00**

*A No. 1a Special Aeroplane Accessory Outfit, Price \$3.25 will convert a No. 1 Special Aeroplane Constructor Outfit into a No. 2 Special.*

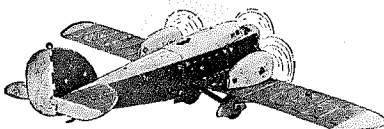

No. 1 Special and No. 2 Special Aeroplane Outfit parts can be purchased separately from any Meccano dealer.

Model of a Light Biplane built with No. 1 Special Aeroplane Outfit

Model of a Commercial Flying Boat built with No. 2 Special Aeroplane Outfit

Model of a Triple-Engine Low Wing Monoplane built with No. 2 Special Aeroplane Outfit

*See Special Note on page 60 in reference to Identification Markings.*

## No. 2 SPECIAL AEROPLANE OUTFIT

This is the finest and most attractive Aeroplane Constructor Outfit on the market. It contains a big range of aircraft parts, with which splendid models of practically any type of machine can be built—44 examples are shown in the Manual of Instructions. Like the No. 1 Special Outfit, the No. 2 is available in two different colour schemes—red and cream, and blue and white.

Price ... .. **\$7.00**

Run your models with an Aero Motor. Details are given on the opposite page.

# MOTOR CAR CONSTRUCTOR OUTFITS

## No. 1 MOTOR CAR OUTFIT

A range of superb motor car models can be built with this Outfit. Look at the example of a Saloon Coupé illustrated at the opposite side of this page, and think of the fun you could have building this and other types equally graceful and realistic.

No. 1 Outfit is supplied in two different colour schemes.

A powerful and long running Clockwork Motor is included. Price **\$2.75**

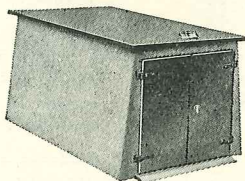

Every model-building enthusiast will be keen to have one of the fine Motor Car Constructor Outfits described on this and the next page.

Sports four-seaters, coupés, speed cars, and other perfect miniature reproductions of many different types of cars can be built with these Outfits. All the models are driven by means of a powerful Clockwork Motor (included in the Outfit), giving a long, speedy and realistic run on each winding.

The motor car parts are finished in rich enamel and nickel-plate, the complete Outfits being masterpieces of miniature automobile craftsmanship.

**IMPORTANT.**—It should be noted that the No. 1 Motor Car Outfit parts cannot be used in conjunction with those of the No. 2 Outfit.

## MOTOR CAR GARAGE

This Motor Car Garage provides accommodation for any Meccano model Motor Car or other car of suitable size. It is strongly built, with imitation rough-cast finish. Inside dimensions: Height 5". Length 13". Width 7 $\frac{3}{4}$ ". Price **\$2.25**

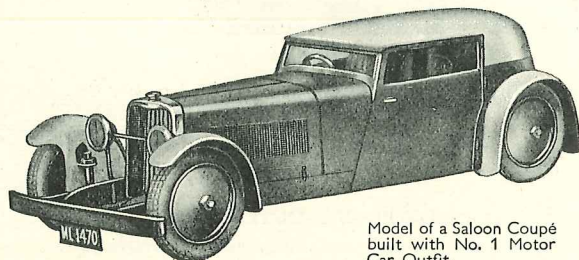

## No. 1 MOTOR CAR OUTFIT PARTS

If extra parts are required they can be purchased from any Meccano dealer.

## BUILT-UP MODELS

Built-up models of motor cars made with No. 1 Outfit are available at the following prices:—

1/1	Sports Tourer (with hood)	...	Price	<b>\$2.75</b>
1/2	Saloon Coupé	... ..	"	<b>\$2.75</b>
1/3	Road Racer	... ..	"	<b>\$2.50</b>
1/4	Sports Tourer	... ..	"	<b>\$2.50</b>

Model of a Saloon Coupé built with No. 1 Motor Car Outfit.

## No. 2 MOTOR CAR OUTFIT

### BUILT-UP MODELS MADE WITH No. 2 MOTOR CAR OUTFIT

Built-up models of any of the Motor Cars that can be made with No. 2 Outfit are available. Price **\$5.75**

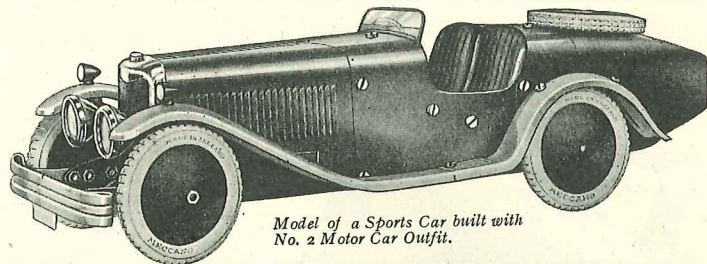

### No. 2 MOTOR CAR OUTFIT PARTS

If extra parts are required they can be purchased from any Meccano dealer.

Larger models of a superior type can be built with No. 2 Motor Car Outfit. They are all perfectly designed and are the most attractive examples of constructional automobile engineering ever produced.

The No. 2 Outfit is available in two different colour schemes.

A powerful Clockwork Motor giving a run of 150 ft. on one winding is included in the Outfit. Price **\$5.75**

*Model of a Sports Car built with No. 2 Motor Car Outfit.*

### MOTOR CAR LIGHTING SET

This Lighting Set enables the headlamps of Motor Car models built with the No. 2 Motor Car Outfit to be electrically lighted. Price **85 cents**

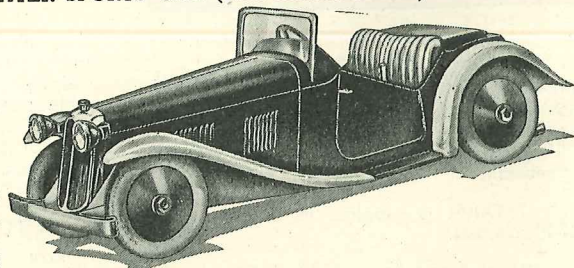

The Lighting Set contains everything necessary for equipping No. 2 Motor Car models with electric lighting, except a dry battery. This should be of the 3-volt type, size  $1\frac{1}{2} \times 2\frac{1}{2} \times \frac{3}{4}$  in., and can be obtained from any dealer in electrical supplies.

### TWO-SEATER SPORTS CAR (Non-Constructional)

This realistic model of a two-seater sports car is beautifully made and finished. It is fitted with a strong clockwork motor that gives a long and steady run on each winding.

The model faithfully resembles the modern type of sports two-seater car. It is supplied in two different colour schemes, both of which are exceedingly attractive. Non-constructional.

Price **\$1.75**

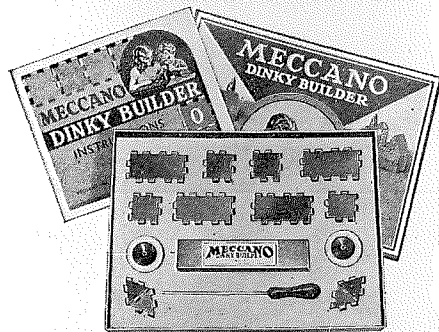

Overall dimensions : Length  $8\frac{1}{2}$  in. Width  $3\frac{1}{4}$  in. Depth  $2\frac{3}{4}$  in.

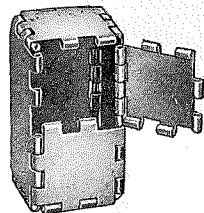

## DINKY BUILDER OUTFITS

No. 0 DINKY BUILDER OUTFIT

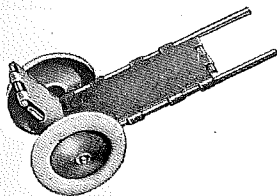

This is the first Outfit in the series. It contains a good assortment of Dinky Builder parts (including two road wheels), with which a splendid range of models can be built. The Instruction Folder included gives examples of 40 models, but many others of an original character may be constructed by the inventive boy or girl. Price **75 cents**

No. 1 DINKY BUILDER OUTFIT

This splendid Outfit contains a varied selection of parts, including two trees on die-cast stands that lend the correct atmosphere to models of farm buildings, churches, etc. A further attraction is a set of four road wheels for constructing miniature wheel toys, many examples of which are illustrated in the Instruction Manual that is included. This Manual shows a total of 56 fine models. Price **\$1.35**

# DINKY BUILDER OUTFITS

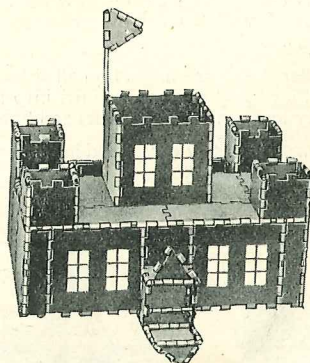

## No. 2 DINKY BUILDER OUTFIT

The No. 2 Dinky Builder Outfit is a great favourite with young people because of the varied and delightful range of models it will build. It contains a comprehensive selection of parts with which a total number of 74 models can be built. These include six groups of delightful miniature model furniture. Full instructions for building the complete range of models are given.

Price \$2.25

The charm of certain Dinky Builder models, especially of furniture suites, is greatly enhanced by the addition of the miniature Table Lamp, which is lighted from a 4-volt pocket battery. For prices of Lamp, Shade and Base, see parts list on this page.

CASTLE

This fine model of a castle is built with No. 3 Dinky Builder Outfit.

## DINKY BUILDER "A"

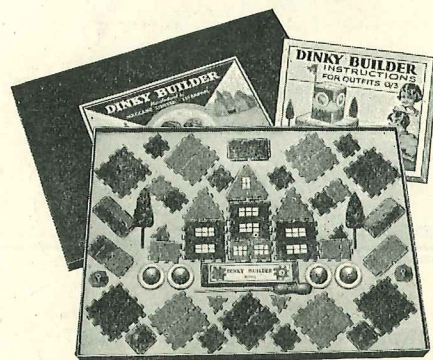

The Dinky Builder "A" packet contains a useful assortment of Dinky Builder Parts. Boys and girls should supplement the equipment they at present possess by purchasing one or more of these packets, which will greatly increase the scope of their Outfits.

Price 30 cents

## No. 3 DINKY BUILDER OUTFIT

This is the largest Outfit in the series, and its model-building possibilities are almost limitless. It is the ideal gift for young boys and girls. No other could give them the same pleasure and the same intense satisfaction.

The parts contained in this Outfit can be used over and over again to make hundreds of different models, including Towers, Bridges, Buildings of all types, Wagons, Aeroplanes, Delivery Vans, Motor Cars, Furniture, etc. Full instructions are provided.

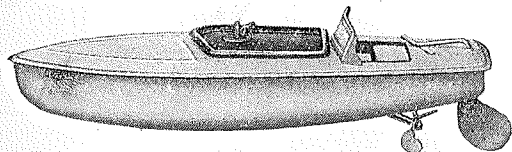

Price \$3.25

Not only are Dinky Builder models delightful to look at and fascinating to play with, but they have the great virtue of being strong and rigid when they are built.

# HORNBY SPEED BOATS

Hornby Speed Boats follow closely the design and general characteristics of the world's most famous speed boats. They are fast and have a good length of run, and they behave well even when the surface of the water is disturbed by a moderate breeze. Each model is built with the same precision and craftsmanship as the famous Hornby Trains.

**HORNBY No. 1 SPEED BOAT "HAWK"**
