

# Good News!

## THE NEW MECCANO

### Meccano in Colours

Meccano, already known as the greatest constructional system in the world, has this year an additional attraction—the plates, braced girders, etc., are beautifully enamelled in bright colours. Thus, not only is it now possible for you accurately to reproduce big engineering structures in model form, but you can also satisfy your artistic taste and introduce colour and sparkle into your New Meccano models, making them more realistic than ever.

### Hundreds of Models in Colours

The New Meccano coloured parts may be used in hundreds of models. To all they bring a delightful charm and enhance the appearance of even the simplest models, and this effect is gained without sacrificing any of the perfect engineering qualities of the Meccano system.

### The New Parts Improve Your Models

Users of the old style Meccano Outfits may add the coloured parts to their equipment, and thus be able to improve the appearance of their models. If nickelled parts are preferred they may still be obtained at the same prices as the coloured parts.

An illustrated accessory parts price list is available and every Meccano boy should make a point of securing a copy of this list for reference purposes.

Ask your dealer  
for a  
copy.

# THE NEW MECCANO

The New Meccano coloured parts may be used in hundreds of models. To all they bring a delightful charm and they enhance the appearance of even the simplest models. Think of the wide scope the New Meccano gives to

your artistic abilities—and in this connection it may be mentioned that in the "Meccano Magazine" we shall announce special competitions with big prizes for the most effective models built with the New Meccano.

## No. 2 Outfit

This is a splendid commencing Outfit with which many interesting models may be built, all designed upon sound engineering principles. Everything requisite for building is included in the Outfit and there is nothing further to buy.

Price 15/-

## No. 4 Outfit

A fine substantial Outfit containing a larger selection of parts which enables the user to embody a variety of new movements and mechanisms into the models he constructs. The Book of Instructions provided shows how 263 models may be built.
