

"DOLLY VARDEN" DOLL'S HOUSE

WE have designed and produced a new Doll's House which provides an exquisite setting for the Dinky Toys Doll's House Furniture. The exterior design is of a pleasing half-timbered type, and the interior rooms show choice up-to-date decorations. The house is collapsible and it arrives in a parcel which is less than an inch in thickness. It is made of reinforced leather board, and when set up is as strong as a wood structure. The container, which is also made of reinforced leather board, opens out to show a lovely garden with Tennis Lawn, Carriage

Drive, Rockery, Crazy Paving, etc., and when the Doll's House is set up in the position marked out for it, the effect is unusually delightful. The play possibilities are increased by adding Dinky Toy Motor Cars, Hedging, Trees, Garden Furniture and various other miniatures in the Dinky Toys range.

If every Meccano dealer will erect and show a "Dolly Varden" Doll's House, laid out with Dinky Toy Furniture and other Dinky Toys models, as shown in our illustration, he will increase his profits and give a lot of pleasure to his customers. Supplies of the Doll's House will be ready during June.

DINKY TOYS

DOLL'S HOUSE FURNITURE

The success of Dinky Toys has been very great, and our dealers have shown good business judgment by recognising the value and profit to be obtained from the display and sale of these beautiful miniatures. They will welcome, therefore, the extension of the series into the realm of Doll's House Furniture. This furniture is far superior to anything of its kind that has ever before been produced for the delight and pleasure of young people.

The design, finish and presentation of these charming new pieces have been chosen with much care and thought, and we hope that each dealer will examine them and satisfy himself of their beauty and selling qualities. There is a tone and unity of design in them which will commend itself to all children, and make a real appeal to parents. Among the most attractive features of the furniture are the opening doors and drawers.
