

MECCANO

INSTRUCTIONS FOR No. 00 OUTFIT

PRICE 10 CENTS

Boys—Build Better Models.

Would you like to build all the splendid things which Mechanics and Engineers build? You can with Meccano. All the Meccano parts fit in with those you have in your No. 00 Outfit and you can keep adding to your set until you are able to build all the wonderful things which you see. This is the advantage of the standardization of the whole Meccano system. Once you have got the idea of the equidistant holes and interchangeable parts you can do anything with them.

Our big Manual of Instructions, (136 pages) which comes with the larger regular outfits, will show you a lot of wonderful things which any boy can make with Meccano.

FIELD GUN

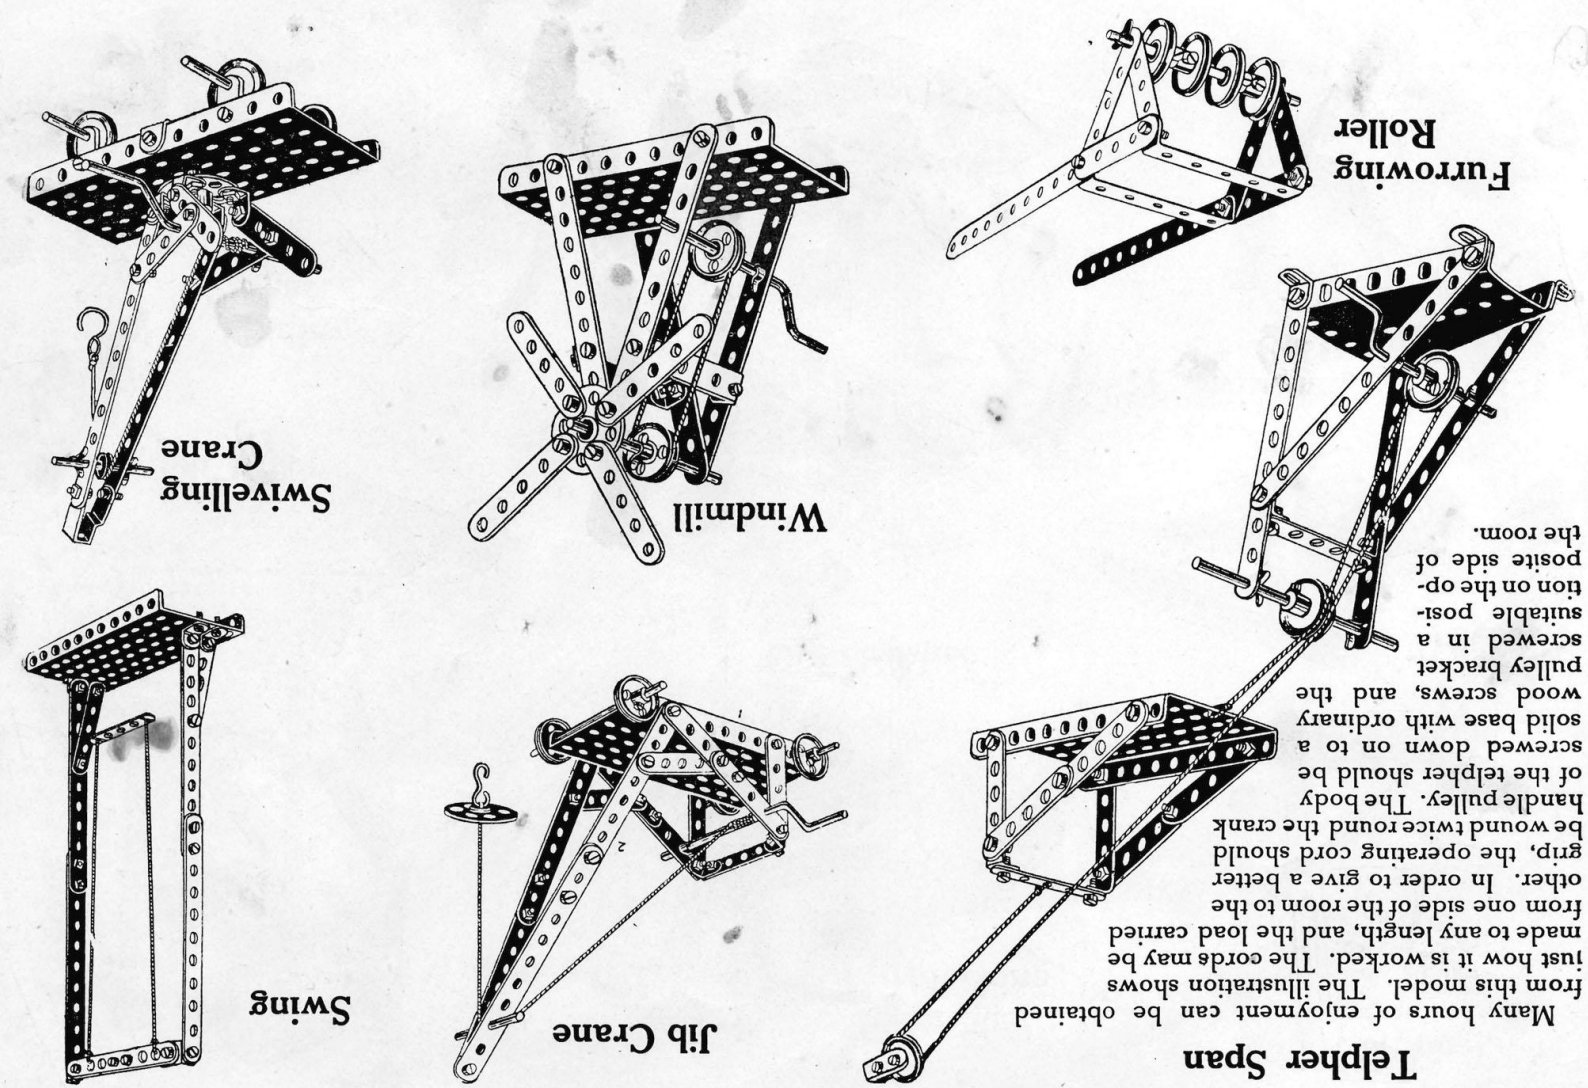

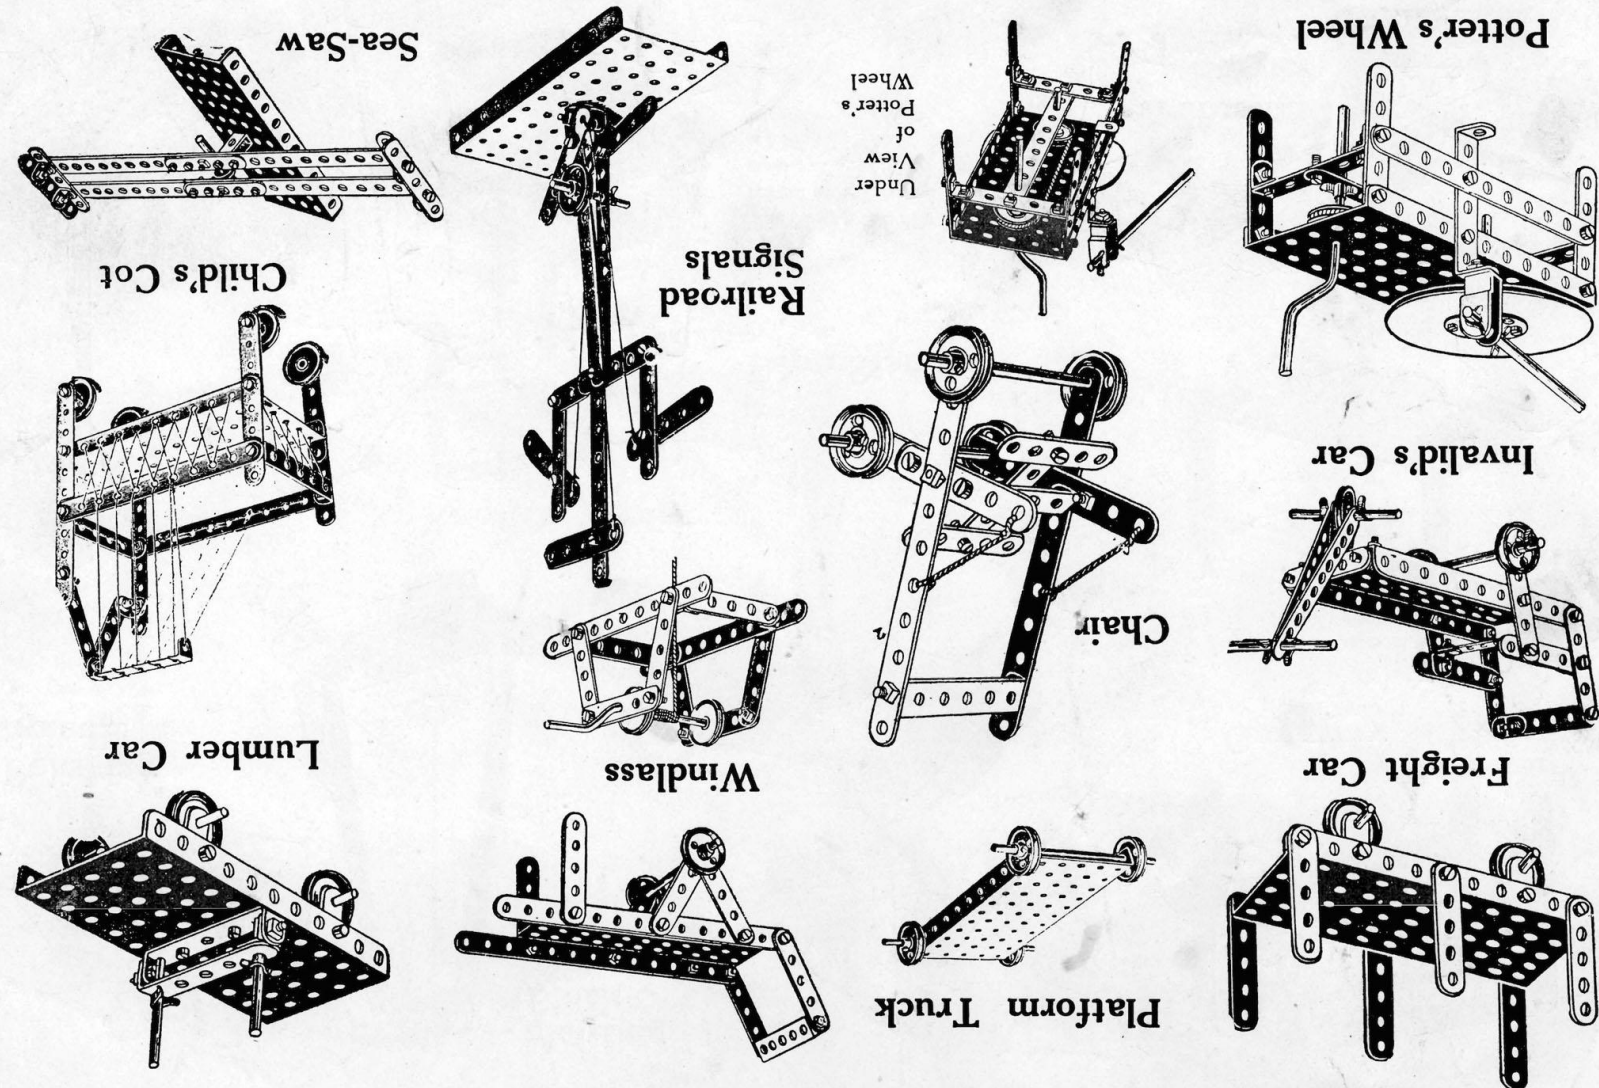

THIS WONDERFUL MODEL of a field gun was made by a boy with his Meccano outfit. It is only one of the thousands of interesting things which you can make with Meccano, such as Guns, Tractors, War Tank, Aeroplanes, War Ships, Giant Cranes and Derricks, Locomotives, machines of all kinds etc., and everything works.

HOW TO BUILD WITH MECCANO

Build the models just as you see them. Then take each model and try to improve on our design. Every model can be made in different ways. Screw them all up tightly and you will find that you can play with the trucks and cranes signals, etc., and do all kinds of work with them.
