

MECCANO®

© Meccano Limited Binns Road Liverpool 13 England

How to Use This Book

On the back cover of this Book you will find pictures of the Parts in Outfits 2 and 3 together with their names and Part Numbers. Parts used in the assembly of the models shown in this Book generally can be identified by looking at the illustrations, but where the identity of Part may not be clear, its Part Number is printed in RED on the illustrations.

A list of the Parts needed to build each model also is given. In this list the Part Numbers are printed in RED and quantity required in BLACK.

Some arrangements of Parts are used frequently in model-building. They are called *Basic Meccano Constructions* and are illustrated on pages 15 and 16 of the 1 Model Book. Each has an identifying Code Mark i.e., BC1, BC2, etc. When one of these Code Marks appears in the illustrations it indicates the principle of construction referred to by the same Code Mark in the 1 Book.

Some models are constructed in separate units. The points at which these units are bolted together to form the complete model are indicated by red dots. Where red indicating lines pass behind Plates or other parts of a model, they are shown dotted.

Motors also are identified in the illustrations by Code Marks: M1 = Meccano Magic Motor; M2 = Meccano No. 1 Clockwork Motor; M3 = Meccano E15R Electric Motor; M4 = Meccano Emebo Electric Motor.

Models for Outfit 2 are shown on pages 1-8; models for Outfit 3 appear on pages 9-24.

Como emplear este Libro

En la cubierta posterior de este libro se hallan las piezas ilustradas de los Equipos Nos. 2 y 3 junto con su nombre y respectivo número. Las piezas usadas en la construcción de los modelos que se ven en este libro pueden reconocerse sencillamente si se estudian las ilustraciones. En caso de que una pieza no pueda reconocerse enseguida, el número se ve en COLORADO en las ilustraciones de modelos.

Se incluye una lista de las piezas que se necesitan para cada modelo. En esta lista el número de las piezas es COLORADO y la cantidad va en número NEGRO. Algunos conjuntos de piezas se emplean una y más veces en toda clase de modelos. Se llaman *Construcciones Básicas Meccano* y se ilustran en las páginas 15 y 16 del Libro de Modelos No. 1. Cada uno tiene la marca de un Clave especial, por ejemplo: BC1, BC2, etc. Cuando se ve una de estas marcas en las ilustraciones, indica el método de construcción descrito bajo la misma marca en el Libro 1.

Algunos modelos se construyen en unidades separadas. Los puntos colorados en los dibujos denotan los puntos en los cuales estas unidades se empernan juntas.

Los Motores también se indican en los grabados con las marcas de Clave siguientes:

M1 = Motor Meccano Magic; M2 = Motor a Resorte Meccano No. 1; M3 = Motor Eléctrico Meccano E15R; M4 = Motor Eléctrico Emebo.

Modelos para Equipo No. 2—Pág. 1-8. Modelos para Equipo No. 3—Pág. 9-24.

Como usar este Livrete

Na capa de trás deste Livrete, aí encontrará o desenho de todas as peças com nomes e numeros de referencia. As peças usadas na construção dos modelos ilustrados neste livrete podem ser identificadas simplesmente pelas ilustrações, mas quando a identificação de uma peça não é clara o seu número e indicado a VERMELHO no desenho do modelo.

Cada modelo é acompanhado por uma lista de todas as peças necessárias para a sua construção. Nesta lista os números do catálogo das peças são imprimidos a VERMELHO e as quantidades de cada peça a PRETO.

Algumas montagens simples são usadas muitas vezes em todas as espécies de modelos. Chamam-se estas Construções básicas do Meccano e são ilustradas nas páginas 15 e 16 do Livrete 1. Cada uma tem um código de identificação, tal como BC1, BC2, etc. Quando se vir um código num desenho, saber-se-á que a construção dessa parte do modelo é semelhante ao construção ilustrada no Livrete 1.

Alguns dos modelos são construídos em unidades separadas. Os pontos nos quais estas unidades são colocadas e aparafusadas juntas para construir o modelo completo são indicados nos desenhos com pontos vermelhos.

O tipo de Motor é indicado nos desenhos por um dos seguintes códigos de identificação.

M1 = Motor Meccano Magic; M2 = Motor Meccano No. 1 com mecanismo de corda; M3 = Motor Meccano Elétrico E15R.

Modelos para Estojo 2—pag. 1-8. Modelos para Estojo 3—pag. 9-24.

Att använda denna bok

På bakre omslaget finner Du avbildade delarna i bygglädorna 2 och 3, med beteckning och nummer. Delarnas namn används för byggandet av modellerna i denna bok kan Du lätt känna igen genom att se på avbildningarna, men där Du inte säkert kan känna igen en viss del är numret tryckt i RÖTT på illustrationen.

Varie modell åtföljs av en lista över alla delar, som behövs för att bygga den. I denna lista är katalognumren tryckta i RÖTT och antalet av varje del som åtgår i SVART.

Några enkla konstruktioner används gång efter annan i alla slags modeller. Dessa kallas Meccano grundkonstruktioner och är avbildade på sidorna 15 och 16 i modellboken 1. Var och en har ett speciellt kodnummer såsom BC1, BC2 o.s.v. När Du tex. ser BC1 i en avbildning skall Du veta, att denna sektion bygges som BC1 visar i boken 1.

Några modeller är konstruerade i separata enheter. Punkterna i vilka dessa enheter sättes samman för att forma en komplett modell visas i ritningarna med röda punkter.

Meccanomotorer är också angivna i ritningarna med ett av de följande kodnumren:

M1 = Meccano fjädermotor Magisk; M2 = Meccano fjädermotor nr. 1; M3 = Meccano elektrisk motor; M4 = Elektrisk motor Emebo.

Modeller för bygglåda nr. 2 på sidorna 1-8; modeller för bygglåda nr. 3 på sidorna 9-24.

Hvordan denne boken kan brukes

På omslaget bak på denne boken vil du finne bilder av delene i settene 2 og 3 sammen med navn og del-nummer. Delene som blir brukt til modellsamlingen som er vist i denne boken, kan i alminnelighet kjennes igjen på illustrasjonene, men hvor du ikke sikert kan kjenne igjen en viss del, er del-nummeret trykt i RØDT på tegningen.

En liste over delene som trengs til å bygge hver modell er også med. I denne listen er delnumrene trykt i RØDT, og antallet som går med er trykt i SORT.

Noen konstruksjoner er ofte brukt i modell-byggingen. De blir kalt Meccano grunn-konstruksjoner og er vist på sidene 15 og 16 i 1 modell-boken. Hver har et kodemerke, f.eks. BC1, BC2 o.s.v. Når et av disse kodemerkeforekommer på illustrasjonen, betyr det at konstruksjonsmåten er den samme som vist ved det samme kodemerke i 1 boken.

Noen modeller er konstruert i forskjellige enheter. De punkter som disse blir satt sammen i, for å danne den fullstendige modellen, er vist med røde prikker. Der hvor røde linjer går bak plater eller andre deler på en modell, er de vist ved prikker.

Også motorer blir i illustrasjonene vist ved kode-merker:

M1 = Meccano Magic Motor; M2 = Meccano nr. 1 Urwerk motor; M3 = Meccano E15R Elektriskmotor; M4 = Meccano Elektrisk motor Emebo.

Modeller for byggesett nr. 2 på

sidene 1-8; modeller for byggesett nr. 3 på sidene 9-24.
