

IMPORTANT NOTICE

MECCANO SETS 1970

STANDARD SETS

The new Meccano system for 1970 comprises ten standard Sets, but the old No.9 set has for economic reasons been discontinued, and this has necessitated the re-allocation of Set numbers, so that the old No.0 Set becomes No.1, the old No.1 becomes No.2 and so on, up to No.8, which becomes the new No.9. No.10 remains unaltered.

The Conversion Sets have been re-designed "X" instead of "A" in order to distinguish between the new and old series.

A new No.1X Set has been introduced to bring the new No.1 Set fully into the new system.

Using the table below, it can be seen that an old standard No.1 Set requires a new No.2X to convert it into a new No.3 Set:—

MAIN SETS

OLD NOS.	0	1	2	3	4	5	6	7	8	9	10
NEW NOS.	1	2	3	4	5	6	7	8	9	—	10

In converting old series Meccano Sets to new series, the above parts must be obtained to enable all the New Manual models to be built.

The Mechanisms and Gears Sets have been retained. The Elektrikit, Junior Power Drive and Power Drive Sets are replaced by the following New Motorised and Electronic Sets:—

- No.3M MECCANO SET:** composed of a new standard No.3 Set and a 4½v. reversible D.C. Motor
- No.4M MECCANO SET:** composed of a new standard No.4 Set and 4½v. reversible D.C. Motor and the new Power Control Battery Box.
- No.4EL MECCANO SET:** a self-contained Set made up of special electrical parts combined with the new standard Meccano No.4 Set, enabling a variety of interesting electrical models to be built.
- No.5ME MECCANO SET:** combines a new standard No.5 Set with 3—12 volt D.C. Motor and 6-ratio Gear Box and new Electronic Set.
