

DINKY BUILDER

Instructions for
Outfits No. 0 to No. 3

PRICE
4d.

Dinky Builder is one of
the most fascinating building
systems ever devised
for the delight and pleasure
of young children.

DINKY BUILDER

Instructions

Dinky Builder Plates are hinged on all sides, with intervening spaces, so that when two are placed side by side the hinged part of one Plate fits into the corresponding space in the other. A Rod can be pushed through the complete hinge, and in this manner any number of Plates can be built up to form various geometrical shapes.

The simplest method of connecting a series of Plates together to construct a model is first to lay out the necessary parts, hinges upward, on a flat surface, in the positions they will occupy in the completed models. (See Fig. 2.) The Rods are then inserted, the special tool supplied with the Outfits being used to push them in. (See Fig. 1.)

Fig. 1

It is sometimes necessary to bring the hinges of two separate Plates into line before the Rod is inserted. In such cases the task of lining up will be greatly simplified by pushing the tool through the hinges so that they are brought into line, and then withdrawing it.

The tool must be used when disassembling the models. For this purpose it is pushed into the hinge forming the constructional connection, so that the Rod is forced out. In this manner a model can be taken to pieces in a very short time.

Fig. 2

Where a rod is inserted in the hinges of one plate only, it may occasionally be found that the rod is not gripped quite firmly enough to hold it in position. This may be easily adjusted by inserting the rod in the first hinge of the plate and gently bending this *very slightly* out of line with the other hinges (see Fig. 3). Then, when the rod is once more pushed through all the hinges, it will be held securely.

Fig. 3

Simplicity is the keynote of this new building system, which has already become a great favourite with boys and girls. Not only are the models delightful to look at and fascinating to play with, but they have the great virtue of being strong and rigid when they are built.

As many of our examples show, Dinky Toy Motor Cars, Animals, Figures, Trees, etc., add greatly to the realism and attractiveness of Dinky Builder Models, and increase the fun tremendously.

Ask your dealer for a copy of the latest price list of Dinky Toys in which the complete range of these fascinating miniatures is fully illustrated.

THESE MODELS CAN BE BUILT WITH DINKY BUILDER OUTFIT No. 2

COUNTRY RESIDENCE

The roof of the garage is fitted to the side of the house by means of a long rod. The garage doors are permitted to open by omitting a central rod.

THE BEST THAT
YOU CAN BUY

DINKY TOYS

A CHARMING
COLLECTING HOBBY

Every boy and every girl is collecting Dinky Toys, one of the most delightful and absorbing collecting hobbies ever conceived for children. There are now nearly 250 of these charming miniatures, each one beautifully finished in rich colours. Many of them are ideal for giving the finishing touch of realism to Dinky Builder models and the striking effects possible are fully shown in many of the illustrations in this manual. Ask your dealer for a complete price list of Dinky Toys.
