COPYRIGHT.

This model, built from a No. 1 Set, shows the actual colour of Bayko models.

MADE IN GREAT BRITAIN
PATENT No. 422645
FOREIGN PATENTS PENDING

The fascinating never failing diversion for Boys & Girls...

Manufactured by PLIMPTON ENGINEERING CO. LTD., LIVERPOOL, 3, ENGLAND.

The wonderful reception given to BAYKO BUILDING SETS and the enthusiasm and satisfaction expressed on all sides, is quite easily explained.

BAYKO PARTS are beautifully moulded from attractively Coloured Plastics.

Clean, hygienic and easily sterilized by placing in boiling water or diluted antiseptic, these Sets are ideal for children incapacitated by sickness or disease.

Easy to handle, yet firm and rigid in construction, each model is an excellent replica of the actual building. There is no limit to the range of models that can be built.

Wonderfully constructed, each part fits perfectly into position.

These interesting and fascinating BAYKO Sets awake a common interest in both young and old alike.

A Skyscraper, over 6-ft. high, has been constructed, and, except for the extra lengths of Rods, was constructed entirely from Standard Parts.

The models shown in this booklet are only put forward as suggestions. Many others can be built from the ideas and ingenuity of the builder.

One can further increase the scope of Model Building by the purchase of a Conversion Set. Thus, by purchasing a No. 0X Set, one converts a No. 0 Set into a No. 1 Set, and so on.

Converting Sets cannot alone be used for building models, but must be used with one of the Standard Sets.

Only by actually building any of the hundreds of models, can one realise the spirit of achievement and satisfaction derived from building with BAYKO BUILDING SETS.

Many new parts detailed and illustrated on pages VII to XII, are now available, and when used in conjunction with any standard set add greatly to their scope and variety.

These parts and also those contained in standard sets may be purchased separately ONLY from your dealer.

#### Sizes of Standard 'BAYKO' BUILDING SETS

No. 0 SET	 	 	No. 0 X—CONVERTING No. 0 INTO No. 1
No. 1 SET	 	 	No. 1 X—CONVERTING No. 1 INTO No. 2
No. 2 SET			No. 2 X—CONVERTING No. 2 INTO No. 3
No. 3 SET			

You can see from the above sizes of BAYKO BUILDING SETS, that, by purchasing Converting Sets, it is possible to increase from your present Set, right up to No. 3 Set.

#### HOW TO BUILD A 'BAYKO' MODEL

After deciding which model you want to build, count out the listed parts necessary for doing so.

Join the bases, when necessary, by means of the base links as shown on Page VI. Place the rods in the positions marked on the plan, taking care to use the correct lengths. Use standard length rods as marked on each diagram, except where otherwise indicated, for example—on Page 5. Entrance Gateway Model has standard 3 Brick Rods, except where figures 1 and 2 Brick Rods are placed. The same applies to all models.

Now fit bottom row of parts in position exactly according to plan, the particular part being indicated by its initial letter.

By referring to the diagram on Page VI the method of fitting Bayko parts is clearly shown.

It is helpful to use Tie Bars and Corner Ties after the 3rd row of building.

Models of flat roofed buildings of almost any shape and size can be built, using a piece of cardboard painted and cut to size for roof.

#### Below are illustrated methods of using certain parts

Use of Canopy. Note Corner Tie as support.

Use of two sets of Steps.

Sectional Roof complete, showing End Section.

Method of assembling Sectional Roof.

#### METHODS OF USING "BAYKO" PARTS

- 1. Corner made by using End Brick with ordinary Brick.
- 2. Door plus Half Brick equals three Bricks in height.
- 3. Commencement of Full Bay Window; note wires are placed through the OUTSIDE hole ONLY.
- 4. Method of interlocking Bricks.
- 5. Brick, Window and Half Brick equals three Bricks in height.
- Commencement of Small Bay Window; note wires are placed through the INSIDE hole ONLY.
- 7. Long Brick, two of which are equal in length to three Bricks.
