No. 2 DOUBLE STOREY HOUSE

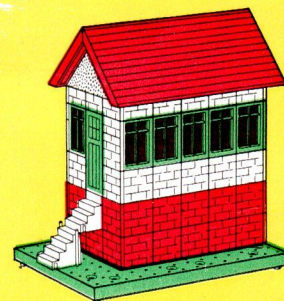

BAYKO Building Sets offer the finest assortment of perfectly detailed parts for model building, which can be used indefinitely and will yet survive years of rough treatment.

Even from the smallest set, the parts provided will build a wide variety of models and as the builder becomes more ambitious, Converting set are available, to increase from one set to the next largest in the range.

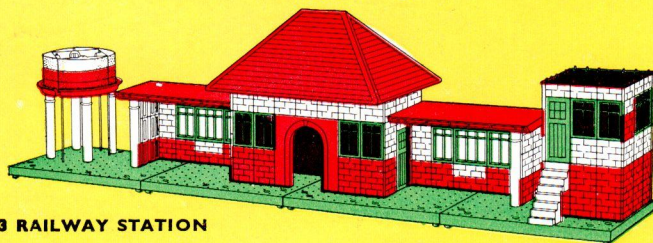

In each set is an instruction booklet which clearly illustrates the ingenious interlocking method used, and gives a large number of suggested models that can be built from each set.

The real enthusiast derives much satisfaction and pleasure from BAYKO, in building models to his or her own design. Public Buildings, Schools, Hotels, Flats, all are easily modelled as there is no limitation with BAYKO. Railway Stations and all lineside buildings can be built to use in conjunction with Railway layouts.

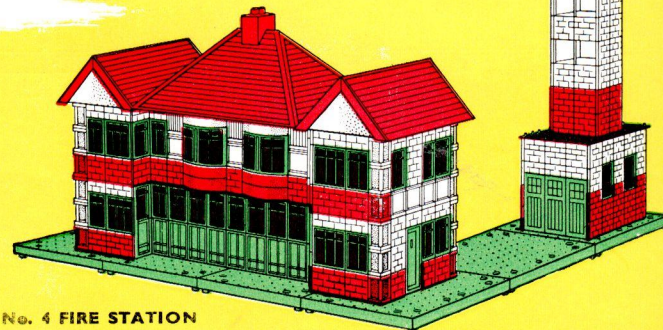

Start now and join the many thousands of BAYKO enthusiasts.
