HELLO BOYS —

IF YOU LIKE THRILLS AND ADVENTURES —
YOU'LL LIKE BEING AN ERECTOR ENGINEER

You'll find engineering thrills by the dozen building with Erector. One day you can be an automobile engineer and build a big motor truck. Put it together—piece by piece—with your own hands. Another day you can construct a giant Derrick with a real electric motor in it—and then make it work just like the ones you see on the highways. Then you can build a draw bridge that actually opens and closes—a towering ship crane such as used in Uncle Sam's Navy Yards—a mighty hoisting engine—an airplane—and dozens of other thrilling engineering marvels. Then there are many other fascinating models you can make such as Jib Cranes, Battleships, Wagons, Trucks, Ferris Wheels, Elevators, Merry-go-rounds, Tractors, Walking Beam Engines, etc.

Does that sound like fun? I'll tell you boys, being an engineer is the most exciting thing in the world. And that's just what you are when you have one of my new Erectors.

Remember too, that building these models is only half the fun. There's an **electric motor in all sets commencing with the No. 4** and the **final thrill comes** when you hook them up and see them hum into action.

Every Erector Set has been completely re-designed and modernized. They are twice as much fun as ever before. You can make more realistic models. You can make them easier and quicker and have fun and thrills you'll never forget.

Your friend,

A.C. Gilbert

How To Make 'Em Book

The Great NEW **ERECTOR**

Hello Boys!

I'm sure you fellows who own one of my great new Erector sets will be just as proud of it as I am—More parts, many in bright brilliant coloring and other important changes, will make Erector model construction more thrilling than ever.

Your Friend, *A.C. Gilbert*

-2 1/2 in. Square Girder

-2 1/2 in. I-beam

D

-Angle Iron

Flooring Construction

To construct a Square Girder commence by putting a long screw through center holes of two girders, as in A; then separate the two, take another girder pushing it down into the grooves or channels, as in B. Having assembled the three sides, take the fourth girder and likewise insert it into the grooves or channels, as in C; then slide it down until the two are flush, which makes a square column girder.

No. 9 1/2 AUTOMOTIVE SET

Electric engine, chassis parts, big channel girders, giant fly wheel segment, etc. Builds automobiles, trucks, giant power plant, elevator, mammoth walking beam engine, parachute jump, etc.35 ea.

No. 10 1/2 WORLD'S CHAMPION
ELECTRIC TRAIN SET.

Features completely assembled electric locomotive with circle of track. Additional equipment builds tender, freight cars, turntable and a host of other fine models including all those built with the above sets.... .35 ea.

Hello Boys! There's "Thrills and Realism" all the way in American Flyer Railroading -

Look over the new American Flyers and you'll want to own and operate the World's finest miniature Trains.

You'll want to be the engineer and send fast expresses over the main lines speeding past green lighted signals and semaphores, roaring through tunnels and over bridges and finally roll in for a station stop and listen to the true to life sound effects of real railroading when a-Koostikin equipment is used. You'll want to see your switcher operate over a net work of trackage in a busy freight yard, take switches and sidings, uncouple electrically and couple automatically in the make up of trains.

You'll want to operate your entire system with trouble free transformers and through remote control and enjoy all the realism of railroading that the big brothers of the iron give. — The thrill will be yours with the new perfected American Flyer rolling stock and equipment, so look them over at your favorite toy store. Make your choice from the many trains available and you're in for realistic, thrilling, hair raising fun.
