# Let's Build Bridges

Bridges are everywhere! . . . and they are very important! Next time you take a long trip, count how many bridges you have to cross to get where you are going. It is exciting fun to build different kinds of bridges with your KENSTRUCT Building Set.

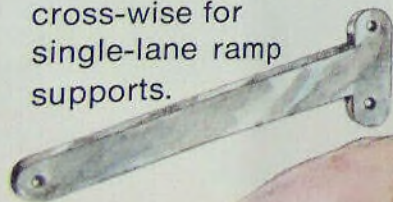

This is a FOOTING. Footings are the bases for Bridges and Roadway Ramps . . . Long ones for two-lane highways, short ones for single-lane roads.

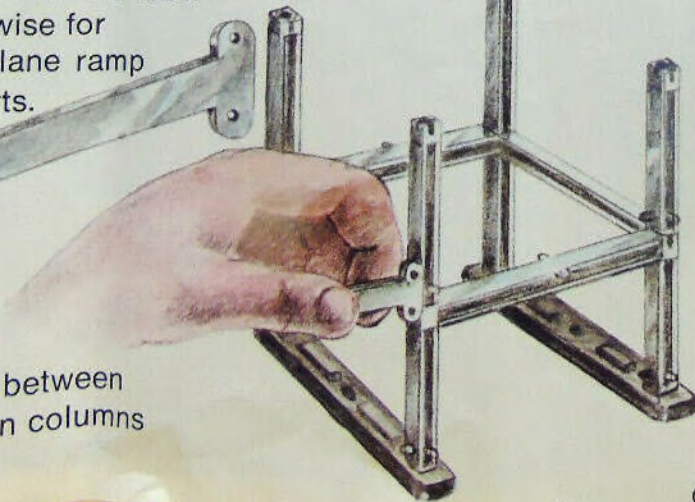

Build up with COLUMNS and BEAMS.

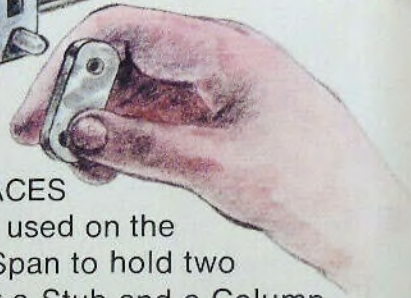

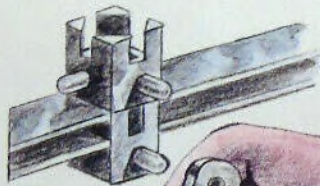

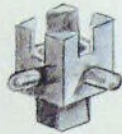

HALF-BEAMS are girders that are used cross-wise for single-lane ramp supports.

This is a CROSS-BRACE. Cross-Braces give strength to the bridge. They fit diagonally between columns or between stubs.

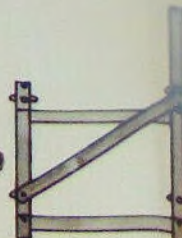

STUBS are small columns used as Roadway Supports or as fasteners at the top and bottom of columns or stubs.

TIE BRACES must be used on the Bridge Span to hold two Stubs or a Stub and a Column together. They are also used as hinges and anchors.

Column to Stub

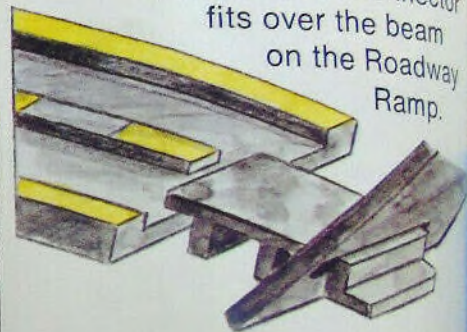

Column to Column

PULLEYS must be added to Bridges as you build.

ROADWAY CONNECTORS are used to connect Roadway Sections. The groove on the bottom of the connector fits over the beam on the Roadway Ramp.

RAMP SUPPORTS Use columns and stubs to build Ramps like you want them.

# Inter Susp

TRUSS BRIDGE You will see this highways. We are going to build a Truss the other Bridge . . . you can crea

1.

2.

# Interstate Highway Set with Truss, Suspension and Drawbridges

## TRUSS BRIDGE

You will see this kind of bridge a lot along highways.

We are going to show you, step by step, how to build a Truss Bridge. Then you can build other Bridges on the following pages, or you can create your very own bridges!

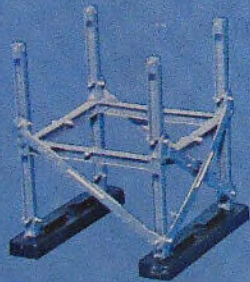

1. Build the two ends of your Bridge.
2. Put the two ends together.
3. Build the rest of the way up. Put Stubs on the top.
4. Put on roads, ramps, lights and signs like you want them. See ROADBUILDING on page 16.

3.

# WE REALLY DO CARE!

We make each toy with lots of Tender Loving Care...so, if something seems to be wrong, please read the instructions again carefully.

However, if your toy does break, please return only the bad part. We will replace it promptly and FREE!

(We will also replace any missing part.)

Be sure to send your NAME, ADDRESS, and the BAD PART to:
