COMMENTS	Typical of the modern idea to restrict models to certain types Models were well proportioned and very realistic in appearance. Very few standard ERECTOR parts were used in these sets
OTHER SYSTEMS NEWSLETTER	9/229
MATERIAL SUPPLIED BY	A.B. Ibanez.

NOTE: The leaflet below is reduced to half size, and part on right missing.

# ERECTOR<sup>®</sup> CONSTRUCTOR "5 in 1" TRADEMARK

## GENERAL INSTRUCTIONS

## SCREWS

Three sizes of screws are used in assembling these models. Here they are:

Use the shortest screw unless otherwise specified. Use one nut with every screw unless otherwise instructed.

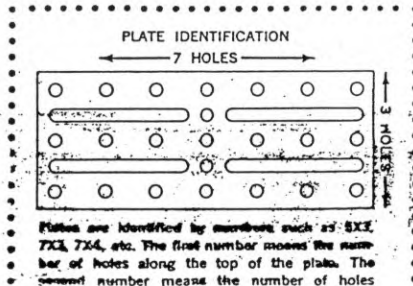

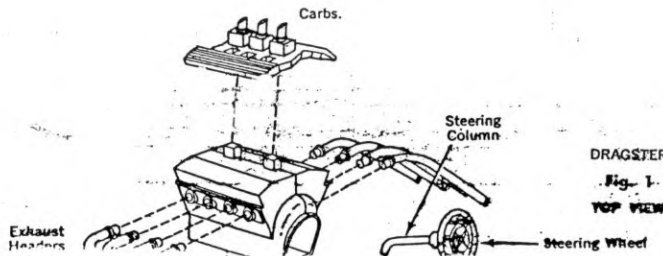

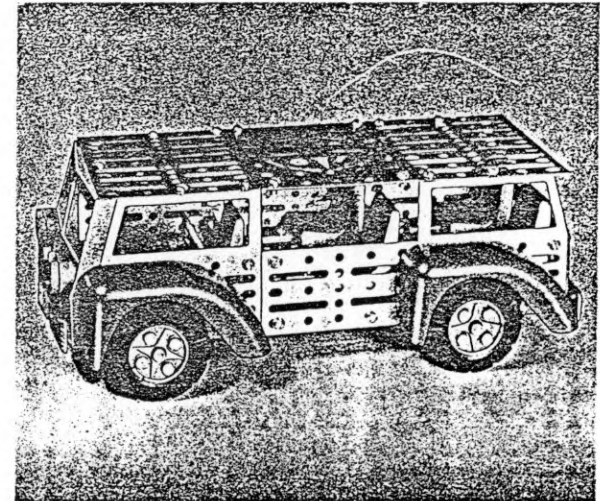

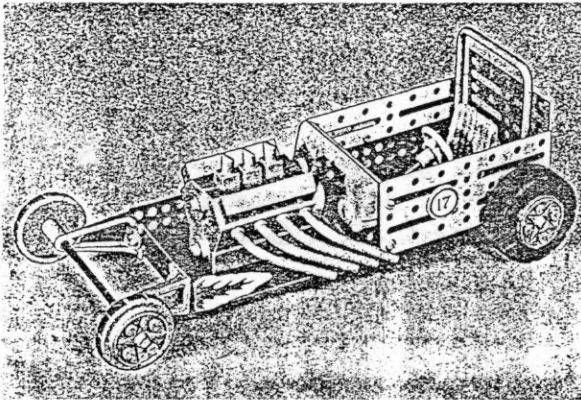

Use un-

## MODELS OF YOUR OWN DESIGN

The basic models on this sheet are only the beginning of the possibilities of this set. As you become more expert at assembly, you will be able to work out

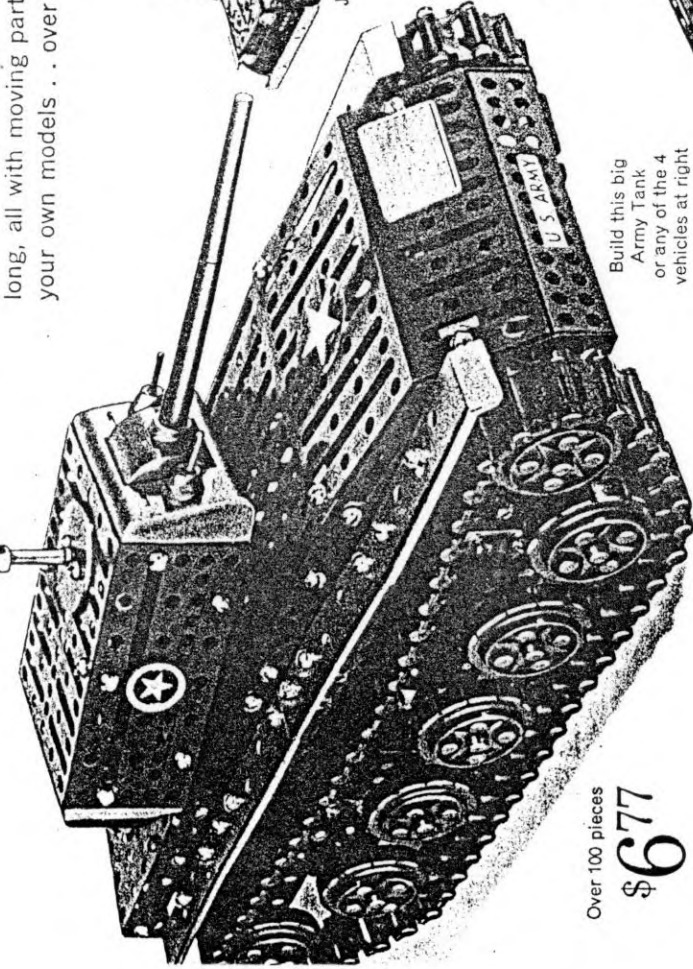

### How to build DRAGSTER

1. Assemble two chassis extensions together with screws (Fig. 1). Reinforce bottom with two 11 hole strips (Fig. 2).
2. Fasten 7X3-hole plates and 5X4-hole plates to chassis extension.
3. Secure turret to side plates.
4. Assemble extended axle mounts to front of chassis extension (Fig. 2).
5. Place engine halves together and push carbs down over square projections on engine halves (Fig. 1).
6. Insert eight exhaust headers into holes in side of engine.
7. Push round lugs on bottom of engine into holes in front chassis extension just ahead of the turret.
8. Secure seat in rear chassis extension. Place steering wheel on column and insert column in hole in seat (Fig. 1).
9. Assemble wheels and axles as in Fig. 2 and place roll bar in position.
10. Decorate the model with insignia.
