COMMENTS	<p>In 1976 Novedades Poch. S.A., (who had been producing Metaling sets since 1970 and the Highway, Army and Clock special sets since 1974), started producing sets using the Meccano again The previous METALING standard sets continued, but with a colour change and were renamed MECCANO METALING. Models in at least some of the sets were as per the UK. The gears changed to white plastic (nylon?). In 1979 they introduced Action Packs similar to the Meccano (England) ones</p> <p>Production of MECCANO METALING stopped in the early to mid 1980s. The exact date is not certain, however the Action sets are virtually identical to the revised packing and sets produced by Meccano (France) so the date for these is not likely to be much before 1984.</p> <p>The quality of the parts was poorer than Meccano (France).</p>
