

NAME	THE TOY PLANNER		
TYPE	Simple Constructional Engineering.		
HOLE DIAMETER	4.8mm	HOLE SPACING	12.7mm nominal.
SETS IN SYSTEM	Probably only one, but see Instruction Sheet.		
DIFFERENT PARTS	6.		
COLOUR	Brass plated.		
FIXING METHOD	8-32 Nut & Bolt.		
MOTORS	None.		
PERIOD	The manufacturer appeared in a Toy listing from 1916 - 1920.		
MANUFACTURER	The Hadley Smith Manufacturing Company, Moodus, Connecticut.		
COMMENTS	The one known Set is quite small: the box lid is shown on p7, & has No.100 on it. The single-sided Model Sheet is on p2, & the 6 different parts can be seen on p4, including the Strip with the 2 unusual diamond shaped holes.		
OTHER SYSTEMS NEWSLETTER	19/533		

MATERIAL SUPPLIED BY Kendrick Bisset.

A Practical  
Mechanical  
Toy

—THE—  
**PLANNER**  
—TOY—

A Delightful  
Toy for any  
Time of year

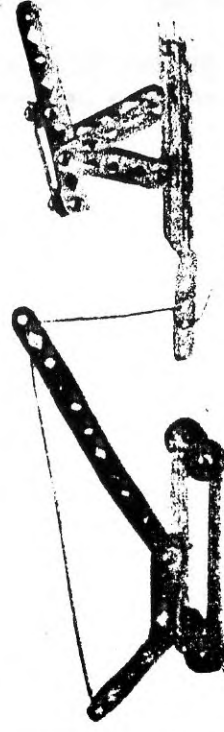

**THE PLANNER HAS A BASE TO WORK FROM**

It consists of Screws, Nuts, Perforated Strips, Wheels, Angle Brackets, and Base Plates. PARENTS, One Set of THE PLANNER will give a boy or girl the idea of Constructing Models. Increase the number of Sets when the child becomes proficient in the art. Practical Experience is the best teacher. Buy your boy or girl a PLANNER set. It is electro-plated and mechanically correct, which insures perfect fitting of all parts.

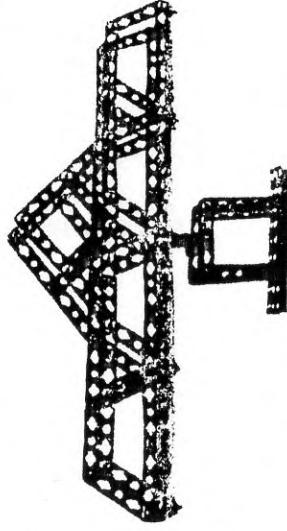

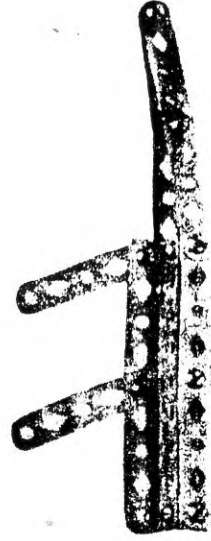

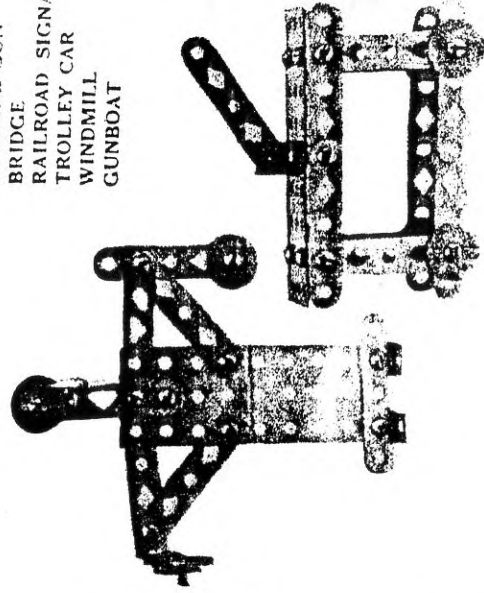

**THERE IS NO LIMIT TO SIZE AND NUMBER OF MODELS THE PLANNER BUILDS.** For instance, 5 set will build Swing Draw Bridge; 10 set will build Building with Tower like illustrations belows, and a great many other models that the boy or girl will originate themselves.

**TWO SET BUILDS** very complete models; **THREE SET 1 LARGER** models; **FOUR SET** still larger; **FIVE SET** speaks for itself, and so on up.

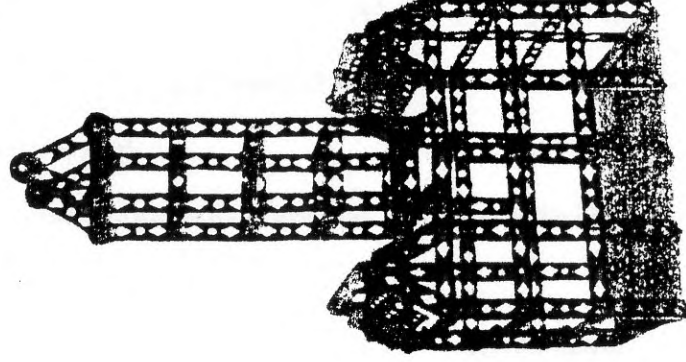

**A Few of the 70 Models One Set Builds**

AREOPLANE,  
WAGON  
DERRICK  
MACHINE GUN  
BRIDGE  
RAILROAD SIGNAL
