The PONY story

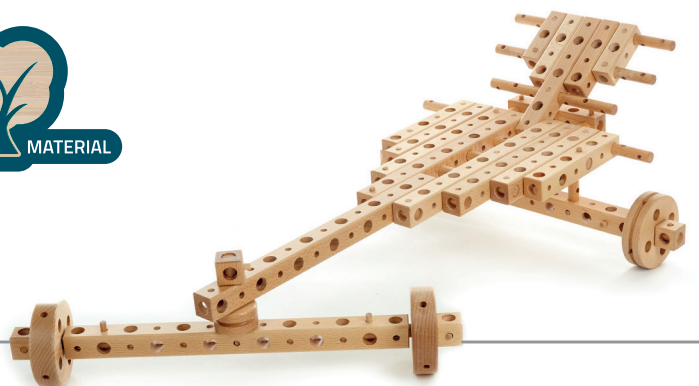

The development of the wooden PONY set dates back to 1991, when academy-trained painter **Jaroslav Chadima** (creator of the set) created this brilliant toy, which contains the beauty of natural beech, especially for the **development of the rough and fine motor skills of children.**

In 1991 PONY MIROŠOVICE Ltd. began making these wooden sets and is responsible for selling them at home and abroad. During 2015, production was moved to Wallachia. Collaboration with a long-term partner is the aim for the further **development of the construction set and for raising awareness about it among customers,** together with increasing production capacity. The close connection between producing and selling the wooden set enables better response to customer requests. Regardless of the above, the most important thing for us remains a playful way for children to develop their skills and strengthen the bond to their parents.

The sophisticated design of the PONY construction set stands at the forefront of outstanding wooden sets not only in the Czech Republic, but throughout the whole of world.

Why PONY

The PONY construction set is a wooden set for **boys and girls of all ages**. You can build anything you can think of simply by joining together the wooden **beams, wheels, poles and pegs**.

PONY is a playful way for your child to develop:

- **Skills** (fine and rough motor skills)
- **Imagination**
- **Developing logical thinking**
- **Fantasy**
- **Concentration**
- **Independence**
- **Endurance**
- **Teamwork** (children often make their creations in groups).

The PONY construction set is extraordinary not just because of its **superior material**, but also thanks to its unique system of assembling and connecting the individual parts. Another important benefit is the development of the **motor and mental skills of your child**. It teaches them **dexterity and concentration**, which children often lose after a while and do not retain long for one thing. While building, children think about how to connect individual pieces into a working product, so they **learn how to create, how to think logically, and last but not least how to use their imagination**.

Material and structural elements

The PONY set is made of high-quality **natural beech wood**. The wooden material used in production is perfectly dried and therefore the wooden construction set retains its form even after years. During production, we pay attention to the high quality of the selected material, and therefore we can say with a little hyperbole that the **PONY construction**

set is "indestructible". The precise and accurate processing of the individual pieces is very important in order to ensure the construction set works properly. The pieces of the PONY construction set are finished with a varnish meant directly for playing with toys and so are harmless.

Each of the PONY wooden sets contains a set of simple **structural elements** - **beam, wheel, connecting rod, pegs, string, rubber band**. By making a sophisticated connection of the individual parts, we can make different shapes and forms of toys according to the instructions in the catalog or through our own imagination. The wooden pegs for joining the individual parts of the set can be pushed in by hand or, the fun way for kids, with a mallet. The biggest reward for builders is the chance to try out a toy. The features make individual setups possible for kids to get on top of them and ride away. You can build, for example, a **car, scooter, buggy, horse, tricycle, cart and other vehicles** where kids can go on a tear.

PONY 01

... this is the basic type of PONY construction set.

The basic variant of the construction set, which came on the market as the first of the three present variations. This was a test product that enjoyed such success at home and abroad that we decided to create additional types of sets – PONY Mini and PONY 02. With the PONY 01, you can build a **tricycle, scooter, PONY, cart, crane, mill, locomotive** and other toys that are more involved than toys from the PONY Mini.

TECHNICAL DETAILS:

Packing dimensions:40,5 x 26,5 x 9,5 cm

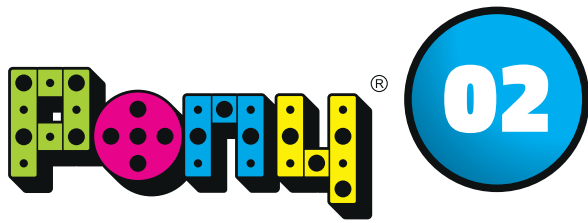

Total weight: 3,1 kg

Number of parts in the construction set:

- beam24 pcs
- connecting rod26 pcs
- pulley wheel1 pcs
- small wheel4 pcs
- peg.....60 pcs
- wooden hammer.....1 pcs
- shake-out rod2 pcs
- rope.....6,0 m
- rubber0,75 m

Hooray for that!!!

PONY 02

... so far the biggest of the PONY construction sets.

Of course, with this set you can build everything from the previous types, and in addition an airplane, robot, car and other things. Other preferences include a big chair for a cart or a comfortable seat on a scooter.

Still don't have any of the PONY construction sets??? Never mind, you can start off with the first type, PONY 02. It contains twice as many pieces as the PONY 01, so the toys you can build from it are really more robust, and your kids can use them together if they are smaller or alone if they are older.

TECHNICAL DETAILS:

Packing dimensions:47,0 x 39,0 x 9,5 cm

Total weight: 6 kg

Number of parts in the construction set:

- beam51 pcs
- connecting rod50 pcs
- pulley wheel2 pcs
- small wheel4 pcs
- large wheel2 pcs
- peg70 pcs
- wooden hammer 1 pcs
- shake-out rod2 pcs
- rope8,0 m
- rubber1,0 m

There's only one thing left. Free up your imagination and start building at full throttle!!!

PONY - pentagonal TEE PEE

... amusing TEE PEE with a unique structure!!!

It is the **original, simple and practical place**, where every child can find a **piece of privacy**. Absolutely **unique** and very popular product at nursery schools and after-school care centres. PONY TEE PEE is an inventive tent of a **pentagonal shape**. Thanks to its size, TEE PEE is an excellent toy not only for small children but also a wonderful accessory to children's playrooms.

Just thanks to the parts of the PONY construction set, the tent structure is **strong but also very light**. You can tidy up the entire TEE PEE simply in such a way that it does not occupy a space or in a couple of minutes you can disassemble it when it is not used at the moment. Another advantage of PONY TEE PEE is a simple handling with a tent canvas, which is fixed with Velcro. The entrance is closed easily with laces. The tent canvas is made from a high resistant material. We produce PONY TEE PEE in several options. The **imitation-leather material is very practical**, up-to-date and easy to maintain, or you can choose a **classical textile option**.

TECHNICAL DETAILS (pentagonal TEE PEE):

Diameter:..... 130 cm

Height (Total height):..... 135 cm (157 cm)

Number of parts in the TEE PEE:

- beam 15 pcs
- connecting rod 20 pcs
- peg 35 pcs
- wooden hammer 1 pcs
- cloth 1 pcs
- shake-out-rod 1 pcs

Because of its
simplicity and mainly
originality is PONY TEE PEE tent
being very favourite at nurseries,
schools and children corners.
It can decorate play rooms
as well as children
room.

NEWS
2017

PONY TEE PEE
tent is practical and fixed
enough for children's
playing and
romping.
