Jones Minor says it must be Primus

—and Jones minor was right—Primus with its wood and metal parts is simply ripping, it builds such topping models, just like the real thing too, you can make them move and work.

Jones took me home last week and showed me the model railway he has built with Primus. There are railway coaches, guards' vans, luggage trucks, everything complete; bridges, signals and all, and his steam engine pulls them round on the rails he has made with his Primus Set. He is going to build a motor car next, and then a steam roller. He says he can build anything with Primus.

So this Xmas I am going to ask the pater to buy me a Set—its wood and metal parts make such clever models. I know of nothing so good and I have seen them all.

Prizes for MODELS.

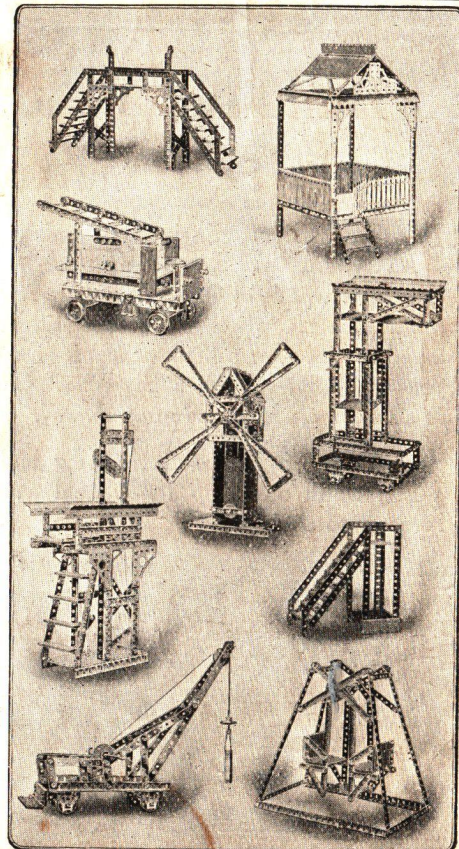

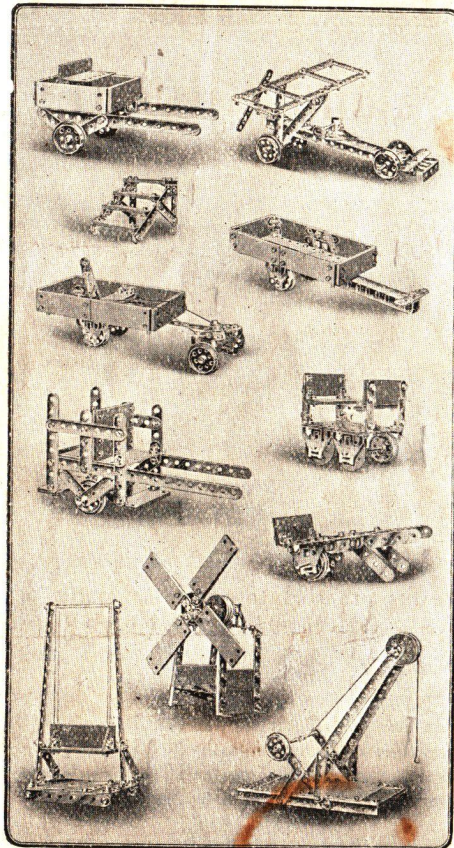

BOYS! There is pocket money for you if you can invent new Primus Models.

Make drawings of your suggestions and enter them, together with the list of parts, in the Primus Prize Competitions.

There is no limit to the number of Models you can enter. The only condition is that you own a box of Primus.

The Models are judged twice yearly, in July and January. All entries should be marked :

Building Wheels with Primus.

JUST as Primus Engineering builds models of everything, so the Primus Big-Wheel Outfit constructs wheels of all kinds. Whenever you want a wheel, a big wheel, a small wheel, a fly wheel, a paddle wheel, or a broad wheel for a steam roller, you can build it with a Big-Wheel Outfit and it is a wheel, a wheel true in every way.

A set of Primus Engineering and the Big-Wheel Outfit opens up a new field for the young inventor to explore.

THE PRIMUS Big Wheel Outfit.

THE Primus Big-Wheel Outfit contains a number of patented parts for building wheels of 4 ins., 6 ins. and 8 ins. diameter.

It is designed for use with the Standard Primus Engineering Outfits and the parts are perfectly interchangeable.
