PRIMUS

ENGINEERING

THE PRESENT FOR THE BOYS

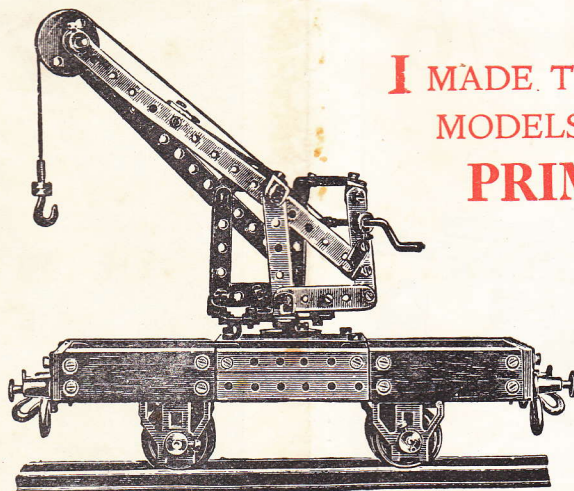

Primus Engineering, the toy for the builder of models. It offers unlimited possibilities in building still and working machines, vehicles, etc. The outfits contain a number of well designed parts, made of both wood and metal, from which a greater variety of models can be made than other constructional toys. Every boy should be the proud owner of a **Primus Outfit**, he can then build with perfect ease, models of the real thing, using wood and metal parts in their correct positions. Each outfit is supplied with a handsomely illustrated instruction manual.

PRIMUS ENGINEERING

SUPPLEMENTARY OUTFITS

These outfits enable the owner of a Standard Primus Set, of small capacity, to increase its proportion to that of the next higher price. This gives the opportunity of building the larger models.

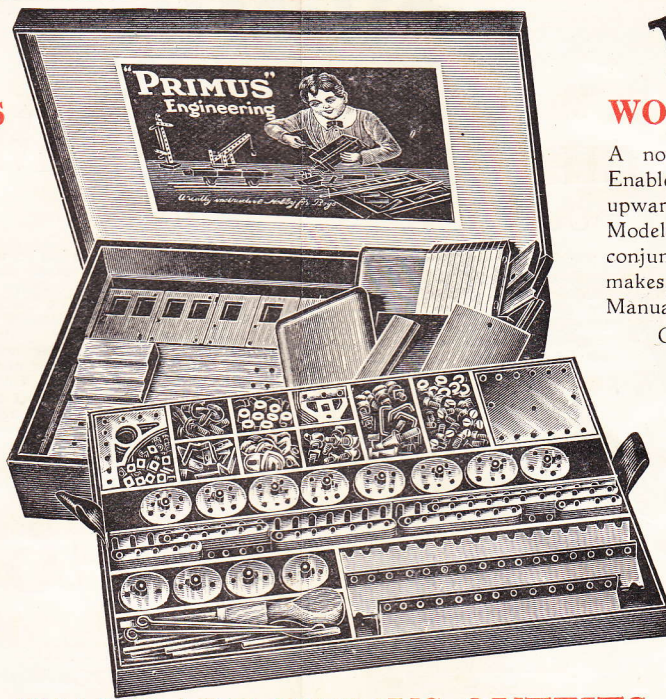

No. 1S. converts No. 1. into No. 2.	s.	d.

CLOCKWORK MOTOR

The Primus Clockwork Motor is the strongest and longest running motor of its kind on the market. The design makes it readily adaptable to all working models. The strongly constructed parts will withstand severe usage without getting out of order. By means of Standard Primus Gear Wheels, Pinions, etc. the speed of the Motor can be varied considerably. Models can be operated at a slow speed or geared up to work at a high speed. All parts are beautifully finished. Boys! use this motor to make your models work.

LOOK FOR THE RED DOME!

Measure $5\frac{1}{2}$ -in. by $3\frac{1}{2}$ -in. fitted with starting, stopping, and reversing levers. Quick wind and designed to readily adapt to work all primus working models.
