# TECHNICAL TRAINER for 1947

ELECTRIC MOTOR WILL BRING  
LIFE TO YOUR CREATIONS  
GEARS AND BELTS—MANY ADDED PARTS

## "TECHNICAL TRAINER"

- "TECHNICAL TRAINER" was created and designed by an outstanding staff of designers and engineers to meet the ever-growing interest of young and old technicians in the new forms of construction techniques.
- "TECHNICAL TRAINER" is made of *DURAL*—the wonder metal. *DURAL* will not rust, will not tarnish, and has a higher strength weight ratio than steel.
- "TECHNICAL TRAINER" is new and is an ideal educational trainer for junior technicians.
- "TECHNICAL TRAINER" is permanently packaged in a durable case similar to that used to protect valuable precision instruments.
- "TECHNICAL TRAINER" case has a place for every part. An empty hole warns of a missing piece. Thus children are taught to return pieces to their proper place, assuring many more happy hours with complete set.
- "TECHNICAL TRAINER" is essentially not a toy. It was created and designed with the purpose of developing and educating young and old alike in all phases of constructive techniques.
- "TECHNICAL TRAINER" can be used to construct many useful and ornamental things for use in home or office.
- "TECHNICAL TRAINER" advanced sets will introduce building by blueprint, thus providing experience and knowledge helpful to all.
