

# TRIX

## 1-1A-2A

TRIX No. 1, 51 parts, with design sheet.  
TRIX No. 1A, 47 parts. Supplementary to No. 1.  
TRIX No. 2A, 44 parts. Supplementary to any other TRIX outfit. Many parts patented.

6<sup>D.</sup>  
Each.

# TRIX

## No. 3

A combination containing parts out of Sets Nos. 1-1A-2A, for making models in endless variety. Displayed in a grand box of many colours. Complete with TRIX Book No. 1 and Book No. 2.

2/6

# TRICY-TRIX

## THE ELECTRIC TRIX 2/6

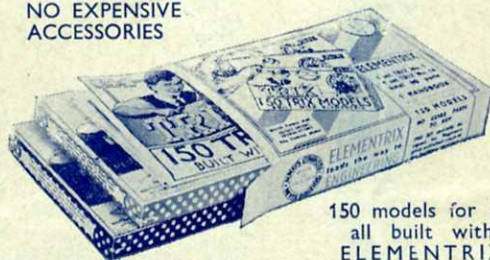

For not only BUILDING models, but also for DRIVING and LIGHTING them with electricity. Book of Instructions makes everything clear, and shows the construction of many fine electrical models, as well as interesting experiments in electro-magnetism.

## KICK OFF HERE!

- Right from the kick-off you can score heavily with "Trix" if you follow the plan of attack outlined here:
- Suppose you start with TRIX No. 1, the original "Trix," price 6d.
- Having built some grand models with the 51 parts provided, pass to Book No. 1. This book with its 74 pages will enable you to tackle bigger and finer models.
- Next make for TRIX No. 1A, another 6d. outfit and supplementary to TRIX No. 1.
- If you prefer, you can start the ball rolling by getting "ELEMENTRIX." This is a combination of Trix No. 1 and Trix No. 1A, packed in a fine new container, but in addition you are presented free with a **GRAND BOOK SHOWING NO LESS THAN 150 DIFFERENT MODELS** and—cheers!—every one of these models can be made with "Elementrix"! 150 models for a shilling! Think of that, boys! Needless to say, "Elementrix" is one of the most popular members of the "Trix" team!
- TRIX BOOK No. 2 now comes into the picture. This gives you still more scope for your skill and shows many models that can be built with the aid of TRIX No. 2A, yet another sixpenny outfit.
- And now to electrify the crowd! Having become a Trix expert, you are now ready to make models go by electricity!
- Your first move in this direction is to get TRICY-TRIX, the Electric Trix and then follow up with Moto-Trix. The latter includes the famous Trix Electric Motor.
- Now make a bee-line for TRIX BOOK No. 3. This shows how to do some really clever work with Trix Gears, various "drives," sprocket chains, motors and other thrilling mechanical devices. When you have mastered the models in this book you can proudly say you have reached your goal!

Don't forget that only with Trix can you Build, Drive and Light models and put them in gear.
